BUILDING INSPECTORS INSPECTION FORM FOR CHILD CARE CENTERS

NAME	E OF OPERATION LEARNING TIME INC.	
ADDR	RESS 25 RANDY CT. TELEPHONE:	
CITY	FUGURY-VARINA STATE NC ZIP 276	-26
BUILD	DING INSPECTORS CERTIFICATE	
1.	The areas in the building that are designated as the licensed space are required by the licensing agency to meet the Building Code in effect when an application for licensure is submitted to the regulating agenc Does the building listed above, to the extent observable, meet the current North Carolina Building Code? Yes	y. _No
2.	If no, list question numbers which do not comply, explain the violation and whether equivalent protection for the safety of the children is provided: 1)	
3	Are any of the above violations of a life safety concern? Yes	No
	If yes, please list question numbers	
4.	In your opinion based on the violations listed above, do you recommend that the Division of Child Development issue a provisional license to allow time for correction of the violations? Yes	No
	If yes, how long (30-60-90 days) and for which violations?	_
	(Note: All violations must be corrected before a license can be issued unless a provisional time peri- recommended or equivalent protection is documented.)	od is
5.	Number of rooms approved for occupancy by children?	-
ó.	Specify any local zoning restriction:	·
Signatur	re of Inspector Kay HOD /Date 7/25/20	
urisdicti	re of Inspector Kay 1964 /Date 7/25/20 tion HARNOH /Phone: 910-893-75	25

The Inspectors Certificate and Building Inspection Form is required to be completed in its entirety before the Division of Child Development (DCD) can consider the document complete. All questions must be answered; any **NO** answers must have a written explanation.

This form was developed through the cooperation of the Division of Child Development and the Engineering Division of the Department of Insurance. Please note that the inspection forms do not cover all areas of the Code, but are intended to be used as a guide for the local inspector. If additional Code items which are not addressed on these forms are found to be in violation of the Code, please document them on the back of this form.

Prepare in quadruplicate: Original & copy to DCD, 1 copy kept by inspector, 1 copy kept by operator.

CHILD CARE BUILDING INSPECTION FORM

SECTION A: The following general questions should be answered for BOTH Educational and Institutional type occupancies.

LIGH'	Is the total area of all windows in the child care room equal to or greater than 8% of the floor area or is artificial light provided?		Yes_	/ No
2.a	Does the room have natural ventilation from a minimum amount of operable wind or door area to the outside that would allow a clear opening that is equal to or greater than 4% or more of the floor area?	low	/	
b	(If NO, go to question 2b). Is space mechanically ventilated as required by North Carolina Mechanical Code?	?	Yes_/_	No
FIRE	(N/A if an existing building)	N/A_	Yes	No
3.	Does this building have a manually operated fire alarm system (electrically installed system with pull box stations)?		Yes_V	No
EXITS				
4.	Are there at least 2 exits (doors, stairs, smoke proof towers, ramps, or horizontal exits) remote from each other on each floor or fire section of the building?		Yes V	No
5.	Is the exit capacity adequate?		Yes	No
6.	Are all means of egress adequately illuminated at all times that the building is occupied?		Yes	No
7.	Are the means of egress identified by readily visible exit signs when the exit or way to reach it is not immediately obvious to the occupants?		Yes	No
3.	Is emergency power provided for centers with more than 300 occupants or for centers providing night care as required by the Building Code?	N/A_	Yes	No
CORRI	DORS AND ACCESS TO EXITS			
).	Are all means of egress unobstructed without passing through a closet, storage area, kitchen, restroom, or other hazardous space?		Yes	No
0.	Are all exit corridors a minimum 1-hour fire resistance? N/A applies only if there are no corridors)	A	Yes	No
	If corridors are <u>not</u> 1 hour fire rated, do all child care rooms, spaces, and areas have a direct level of discharge exit to the outside?		Yes	No
2.	a. Do all corridors, ramps, and passageways have a minimum 6 feet			
	clear width in all areas serving as means of egress for capacity of 100 or more? (N/A if capacity is less than 100) b. Are all corridors, ramps, and passageways not less than 44" clear width in all		Yes	
	areas serving as means of egress for capacity of less than 100? (N/A if capacity is more than 100)		Yes	
3.	Are all dead-end corridors no more than 20 feet in length? (N/A applies only if no dead-end occurs)	N/A_	Yes	No

handle, lever, push pad, or panic hardware? b. If room accomdates 100 or more people, do all required egress and exit doors have push pads or panic hardware? No STAIRS (NOTE: If no stairs, interior or exterior, check N/A and go to Question 22. If applicable, all questions must be answered) 18.a. Are all stairs serving 50 or more occupants at least 44 inches in width? N/A Yes No No Are all stairs serving less than 50 occupants, at least 36" in width? 19. Are all stairs serving less than 50 occupants, at least 36" in width? 19. Are all stairs with four or more steps provided with proper handrails and guardrails? 20. Are all interior stairs enclosed with 1-hour rated walls and 1-hour rated B' labeled doors that are at least 36" wide? 21. Are the stair enclosure doors self-closing? 22. a. Are all wall and ceiling coverings throughout building non-combustible? (Use of untreated combustible fiber boards, wood, and other combustible fiber boards, wood and other combustible? (Use of untreated combustible fiber boards, wood, and other service equired by the Minimum Interior Finish Classification Table, NCBC 22. HEATING SYSTEMS/MECHANICAL 23. Do ceilings in habitable rooms have a minimum of 7-6" clear height? Yes No All Yes No	14.	Do all doors have a minimum clear opening width of 32" (min. door width of 36")			
b. exit doors leading to the exterior? 15. Are all doors in the line of exit travel a swinging door (side hinged)? 16. Do doors to rooms that accommodate more than 50 people swing in the direction of travel? (N/A applies if room accommodates less than 50 people) 17.a Do all required egress and exit doors have single motion, self-unlocking type handle, lever, push pad, or panic hardware? 18. If room accomdates lof or more people, do all required egress and exit doors have push pads or panic hardware? 18. Are all stairs serving 50 or more occupants at least 44 inches in width? 18. Are all stairs serving less than 50 occupants at least 44 inches in width? 19. Are all stairs serving less than 50 occupants at least 44 inches in width? 19. Are all stairs with four or more steps provided with proper handrails and guardrails? 20. Are all interior stairs enclosed with 1-hour rated walls and 1-hour rated "B" labeled doors that are at least 36" wide? 21. Are the stair enclosure doors self-closing? 22. a. Are all wall and ceiling coverings throughout building non-combustible? (Use of untreated combustible fibres boards, wood, and other combustible fibres boards, wood and other combustible fibres boards, wood and other combustible fibres boards, wood and other combustible? 23. Do ceilings in habitable rooms have a minimum of 7-6" clear height? 24. Is the building free of unvented fuel burning or portable electric space heaters? 25. Have air conditioning, ventilation, heating, cooking, and other service equipment been inspected and approved by the appropriate inspectors? 26. a. Is combustion and ventilation air for boiler or heater rooms taken directly from and discharged to the outside of the building? (N/A if electric heat is instabled) 27. Does the number of waterclosets and lavatories comply with the Plumbing Code as determined by the appropriate inspector? 28. No. 29. No. 29. No. 20. Do self-inspected and appropriate inspector? 20. Ose the number of waterclosets and lavatories comply with the Plumbi				Vas	No
15. Are all doors in the line of exit travel a swinging door (side hinged)? 16. Do doors to rooms that accommodate more than 50 people swing in the direction of travel? 17.a Do all required egress and exit doors have single motion, self-unlocking type handle, lever, push pad, or panic hardware? 18. Do all required egress and exit doors have single motion, self-unlocking type handle, lever, push pads or panic hardware? 19. If from accomdates 100 or more people, do all required egress and exit doors have push pads or panic hardware? 19. Are all stairs serving 50 or more occupants at least 44 inches in width? 19. Are all stairs serving less than 50 occupants, at least 36" in width? 19. Are all stairs with four or more steps provided with proper handrails and guardrails? 20. Are all interior stairs enclosed with 1-hour rated walls and 1-hour rated "B" labeled doors that are at least 36" wide? 21. Are the stair enclosure doors self-closing? 22. Are all wall and celling coverings throughout building non-combustible? 23. Are all wall and celling coverings throughout building non-combustible fiber boards, wood and other combustible fiber boards, wood, and other combustible fiber boards, wood and other co				Ves	No.
16. Do doors to rooms that accommodate more than 50 people swing in the direction of travel? (N/A applies if room accommodates less than 50 people) 17.a Do all required egress and exit doors have single motion, self-unlocking type handle, lever, push pad, or panic hardware? b. If room accomdates 100 or more people, do all required egress and exit doors have push pads or panic hardware? b. If room accomdates 100 or more people, do all required egress and exit doors have push pads or panic hardware? N/A Yes No STAIRS (NOTE: If no stairs, interior or exterior, check N/A and go to Question 22. If applicable, all questions must be answered) 18.a Are all stairs serving S0 or more occupants at least 44 inches in width? Are all stairs serving less than 50 occupants, at least 36" in width? N/A Yes No No 19. Are all stairs with four or more steps provided with proper handrails and guardrails? 20. Are all interior stairs enclosed with 1-hour rated walls and 1-hour rated "B" labeled doors that are at least 36" wide? 21. Are the stair enclosure doors self-closing? WALLIS AND CEILINGS 22. a. Are all wall and ceiling coverings throughout building non-combustible? (Use of untreated combustible fiber boards, wood, and other combustible fiber boards, wood and other combustible fiber boards, wood and other combustible fiber boards, wood, and other combustible fiber boards, wood and other combustible fibre boards, wood and other combustible?
