Good Morning,

Please find the approved zoning permit to this email. For a demolition permit please contact Harnett County Development Services 910-893-7525 option 2. You will need a copy of this permit and your asbestos report. If you have any other questions please let me know. Once again, I apologize in the delayed response.

Thanks, Snow Bowden

Subject:

Asbestos Containing Building Material Survey

2001 Erwin Road, Dunn, NC

Dear Mr. Holcomb:

Bar-Lyn Enterprises, Inc, was contracted to conduct Asbestos Containing Building Material Survey for the reference site. The survey for 2001 Erwin Road, Dunn, NC was conducted on August 14, 2020.

Bar-Lyn Enterprises, Inc understands that the subject is scheduled for selective renovation or demolition. In order to facilitate the renovation or demolition, Bar-Lyn Enterprises, Inc performed a survey to identify asbestos containing materials which are required to be removed prior to renovation or any demolition activities.

The survey was performed by Bar-Lyn Enterprises, Inc inspector Peter Mitchell (NC Accredited Inspector #13224). The survey began with a visual inspection of accessible areas for the presence of suspect asbestos containing materials. Both friable and nonfriable suspect asbestos containing material were considered during the course of the survey.

Bar-Lyn Enterprises, Inc. collected Six (6) Suspect Asbestos Bulk Samples. The samples were submitted Carolina Environmental, Inc. for analyses using polarized light microscopy. A tabular summary of the analytical results is provided in attachment. The US Environmental Protection Agency (EPA) classifies material containing more than 1% asbestos as ACM. The materials found to contain regulated levels of ACM are listed below:

After reviewing data from the samples taken, none of the following materials were found to contain asbestos for the buildings:

Material	General Location	Type and Percentage of Asbestos Present	Approximate Amount
None			

F=Friable NF=Non Friable

Any demolition/renovation work in which ACM is disturbed must be in compliance with EPA, OSHA and the State of North Carolina regulations. Please note that the asbestos abatement contractor must notify the North Carolina Department of Health and Human Services (HHS) ten (10) days prior to the disturbance of ACM if it is friable or becomes friable and greater than or equal to 160 square feet, 260 linear feet or 35 cubic feet.

Please contact our office should you have any additional questions.

Respectfully,
BAR-LYN ENTERPRISES, INC.

Feter D. Mitchell
Peter D. Mitchell
NC Accredited Inspector #13224
