☐ Incidental Use Seperation (508.2.5)
This separation is not exempt as a Non-Separated Use (see exception)

☐ Non-Separate Use (508.3)
The required type of construction for the building shall be determined by applying the height and area limitations for each of the applicable occupancies to the entire building. The most restrictive type of construction, so determined shall apply to the entire building.

☐ Separated Use (508.4)-see below for area calculations
For each story, the area of the occupancy shall be such that the sum of the ratiosn of the actual floor area of each use divided by the allowable floor area for each use shall not exceed 1.

$$\frac{\text{Actual Area of Occupancy A}}{\text{Allowable Area of Occupancy A}} + \frac{\text{Actual Area of Occupancy B}}{\text{Allowable Area of Occupancy B}} \leq 1$$
