TE&D Project No.: 2401-010100-D

To Whom It May Concern;

As requested, a representative of Tyndall Engineering & Design, PA (TE&D) was on-site to observe the existing Pre-Engineered Metal Building (PEMB) at the above-referenced address.

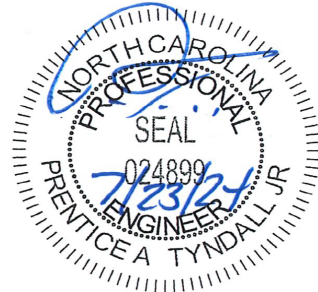

We understand the monoslab foundation and rebar reinforcement had been previously inspected by the municipality of record. The existing structure was visually observed with regard to compliance with the project plans and applicable provisions of the 2018 North Carolina Building Code. During our inspection, the 2-hour rated firewall at the center of the structure was not constructed and therefore not inspected. Based on our visual observations and analysis, client provided photos, and previous inspections, the existing PEMB was constructed in general accordance with the project plans and applicable provisions of the 2018 North Carolina Building Code.

We appreciate being able to assist you during this phase of the project. If you need further assistance or require additional information, please do not hesitate to contact us.

Sincerely,
Tyndall Engineering & Design

Tripp Amos
