Construction, Hardware and Insulation

Cabinet exterior front, one piece sides, and doors are constructed of 22 gauge stainless steel. Cabinet interior and door liners are constructed of anodized aluminum. The exterior cabinet back and bottom are constructed of galvanized steel.

Door self close at less than 90 degrees and also include a stay open feature at 105 degrees. Gasket profile and Santoprene® material simplify cleaning and increase overall gasket life. Both the cabinet and door(s) are insulated with an average of 2" thick high density, non-CFC, foamed in place polyurethane.

Refrigeration System

A balanced, rear mounted, front breathing, self-contained refrigeration system using R-134a refrigerant is provided. It features a capillary tube metering device, air-cooled hermetic compressor, a forced air evaporator coil and a non-electric condensate evaporator. An 8' cord and plug is provided. Standard operating temperature for refrigerator models is 34 to 38°F.

Interior

Standard interior arrangements include two (2) powder coated wire shelves per door, mounted on pilasters. These are adjustable in 1/2" increments, allowing for a minimum of 1-1/2" spacing between shelves.

Warranties

Both a three year parts and labor warranty and a five year compressor warranty (self-contained models only) are provided standard.

Foot Plates

- Use to bolt units to the floor, or when a broader, more stable foot is desired. Foot plates also help to protect floors by distributing the point load of the shelving unit across a larger contact point.
- Foot plates (completely tightened) add 1/8" (3mm) to the specified heights of each stationary post on the table.

Stainless Steel Cat. No. 9993S

"S" Hook

- Used to add on shelving units with only two posts required. Order two per shelf level.

SUPER ERECTA SHELF® DUNNAGE SHELVES DR Series

- **Superior Strength:** Dunnage shelves offer considerably more weight-bearing capacity than other Super Erecta Shelf® shelves and can be combined with them to provide extra strength at the lower levels of a shelving unit where the heaviest loads will be placed. The 36" (914mm) length has a 1,600-pound (750kg) uniformly distributed static load capacity; the 48" (1219mm) shelves hold up to 1,300 pounds (600kg), and the 60" (1525mm) length holds up to 1,000 pounds (450kg).
- **Stress Resistance:** The high static-load capacity of the Super Erecta Shelf® dunnage shelf translates into an increased ability to stand up under the strain of unbalanced loads and the stress of materials repeatedly being placed on the shelf in a less-than-gentle way.
- **Super Erecta Shelf® Construction:** These dunnage shelves have the same tapered corners and split sleeves that fit the 1" (25mm) posts used for other Super Erecta Shelf® shelving. As a result, they assemble easily, fit securely and are compatible with 60 different Super Erecta Shelf types and sizes.
- **Two-Piece Design:** Removable wire deck fits over reinforced 1" (25mm) square, tubular frame. It lifts off for easy, thorough cleaning.
- **Smooth Loading/Unloading:** The front-to-back upper ribs of the deck allow you to slide items on and off the shelves smoothly.
- **Adjustable:** Rolled grooves on the posts enable dunnage shelves to be positioned or repositioned at desired levels in 1" (25mm) increments.
- **Finishes:** Available in chrome-plated, Metroseal 3™ or stainless steel.

*Height includes leveling bolt and cap.

Important: Stability decreases as the ratio of height to width increases when heavier loads are placed on upper shelves. Keep units as wide and low as possible, using the dunnage shelf as the bottom shelf. If two dunnage shelves are being used, both should be placed within the lower half of the unit. Dunnage shelves are not recommended for use in shelf carts or trucks.

SUPER ERECTA SHELF® SOLID SHELVING (18-Gauge)

- **Strength:** Two-fold thickness of 18-gauge steel forms 1/8" (3.2mm) raised edges on all four sides of the shelving. This ship's edge gives all-around rigidity and high strength.
- **Sanitary:** Flat, solid style with the raised ship's edge on all four sides and at the corners contains spills, minimizes contamination and permits easier clean-up. Louvered/embossed shelf design allows air circulation under packages and containers.
- **Galvanized Shelves** with uncoated cast corners are ideal for applications requiring solid shelving or a work surface and minimum resistance to corrosion. Available in flat solid and louvered/embossed styles.
- **Standard Type 304 Stainless Steel** shelves with epoxy-coated cast corners address the majority of applications for solid, corrosion resistant shelves or work surfaces. Available in flat solid and louvered/embossed styles.
- **Premium Autoclave/Cart Washable Type 304 Stainless Steel** solid shelves feature an all-stainless construction to withstand high temperature, corrosive applications. Available in flat solid style.
- **Versatile Construction:** Super Erecta Shelf® solid shelving can change as quickly as your needs change. By using various accessories hundreds of shelving configurations become possible.
- **Shelf Accessibility:** Shelves can be loaded/unloaded from all sides. This open construction allows use of the maximum storage space of the cube.
- **Adjustability:** Shelves can be adjusted in 1" (25mm) intervals along the entire length of the post.
- **Adjustable Feet:** Leveling bolts compensate for surface irregularities. Note: Stainless steel stationary posts include stainless leveling bolts.

Product Notes:

- SmartWall G3 tracks, uprights, and shelf supports are not compatible with earlier generations of original SmartWall or SmartWall Plus.
- When configuring task stations with uprights, choose shelves and grids of the same length. Longer grids may be used but must not overhang the upright by more than 6" (152mm) on either side.
- Grids can be mounted directly behind shelves, but shelf supports and grids cannot occupy the same slots on the upright. Once the grid has been mounted to the upright, the shelf support can be mounted to its own slots and can be adjusted on 3" (76mm) increments within the grid space.
- Calculating the maximum usable wall track mounting space
Stop fasteners are installed at each end of a run of wall tracks and occupy approximately 1" (25mm) of track space per end. Uprights and track-mounted grid brackets must be installed a minimum of 1" (25mm) inboard on the wall track. The maximum usable length of track to install uprights or track-mounted grid brackets is calculated as follows:
Subtract 2" (51mm) from the total length of tracks connected end to end.
Example: Three 72" (1829mm) wall tracks are installed end to end. The maximum usable length of wall track is: (72" x 3) - 2" = 214" [(1829mm x 3) - 51mm = 5436mm]

Reference: Note "C".

SMARTWALL G3™ SYSTEM

Standard-duty configurations consist of wall tracks (optional), grid brackets, and grids.

- For standard-duty applications, grids may be mounted directly to the track or directly to the wall without a track. One kit required per grid.

METROMAX i™ POLYMER SHELVING with *Microban Antimicrobial Product Protection

Part of the innovative MetroMax iQ™ Storage System, MetroMax i™ is a lifetime storage solution. The product is corrosion proof, easy to clean, strong like wire shelving, and provides a very efficient use of storage space. MetroMax i™ is integrated with online space planning tools and tutorials. www.metro.com/iQ

- **Lifelong performance and corrosion proof:** All-polymer and Type 304 stainless design offers a lifetime warranty against rust and corrosion.
- **Strong and Durable:** Strong as steel, MetroMax i™ shelves hold as much weight as Metro's wire shelving and are impact resistant. Weight capacity for evenly distributed loads:
800 lbs. (363kg) per shelf for lengths of 24" to 48" (610 to 1220mm)
600 lbs. (275kg) per shelf for lengths of 54" (1370mm) or longer
2,000 lbs. (907kg) maximum per stationary unit.
- **Easiest to clean and maintain:** Smooth surfaces easily wipe clean. Polymer mats can be easily removed and cleaned in a sink or dish machine. Microban antimicrobial product protection is built into the high contact areas of the shelf including the mats, frames, and posts to protect the product from bacteria, mold, mildew, and fungus that cause odors and product degradation. Microban protection keeps the product "cleaner between cleanings".
- **Smooth, Protective Surfaces:** Smooth, flat surfaces protect packaged shelf contents from unwanted rips, tears, or damage.
- **Robust Open Grid and Solid Mat Options:** Open grid shelves promote air circulation and light penetration. One-piece solid mats contain spills and are ideal to protect items on the bottom shelf from dirt or backsplashes from cleaning floors. Shelf mats are sturdy and safely support concentrated loads from instrumentation and equipment.
- **Interchangeable:** Part of the MetroMax iQ™ Storage System, corrosion proof MetroMax i™ shelves and posts are compatible with corrosion resistant MetroMax Q™ shelves and posts.
- **Efficient, Organized Storage:** Premium MetroMax iQ™ accessories efficiently organize, contain, and compartmentalize **all** space between shelves.
- **Fast, Easy Assembly:** MetroMax i™ assembles easily in minutes, without tools. Shelves can be adjusted at 1" (25mm) increments along the post. Shelf wedges have a window to locate your desired position.
