Parent Permit:

Owner: RAWLS BAPTIST CHURCH

Parent Project:

Contractor: <NONE>

Details:

Since this is a private school and no food is being prepared here, then this does not need to go thru H&S.

Emailed applicant to see if this church is on septic or sewer. He check septic on land use. But sewer looks like it is there.

Informed applicant that he will need to pay for an existing tank fee with EH.

Per conversation with Jamie Turlington, school does not have to go thru a plan review, since it is classified as a private school. They will go out and inspect when customer is ready. Per her, the will be licensed thru the state.

Sent the AOWE permit sent by Drew Hanson today to Kelley to see what to charge them for this. I will then let him know.

Sent email to Drew Hanson that he will have to submit an ATO to EH before he can have his final.
