Re: Summary of Construction Materials Testing  
**Northwest Convenience Center – CIP Wall**  
Harnett County, North Carolina  
TME Project No.: #251878C

Mr. Brooks:

TM Engineering, Inc. (TME) has provided construction materials testing services for the Northwest Convenience Center Project in Harnett County, North Carolina. Our services included observations of foundation bearing, steel reinforcement for cast-in-place concrete, structural steel, and cast-in-place concrete sampling and testing for the CIP wall.

TME observed the building foundations and confirmed bearing to be in accordance with the specified bearing capacity in the provided plans and specifications. Prior to concrete placement, TME provided observations of steel reinforcement for cast-in-place concrete and found steel reinforcement to be in place and installed per the provided plans. Cast-in-place concrete was sampled and tested for compressive strength. Laboratory break results indicated all concrete sampled met the specified strength. The structural steel welded components for CIP Wall were found to be installed in accordance with the provided plans and specifications with no observed or open discrepancies to our knowledge.

This letter provides a summary of observations documented in our field reports and is not a warranty. No performance guarantee shall be assumed. In all cases the contractor is solely responsible for the direction and quality of the work, adherence to the plans and specifications, and scheduling testing services. This document is intended strictly for the client or its designated representatives.

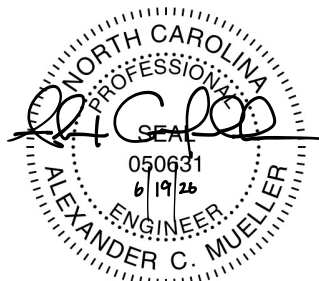

TM Engineering, Inc. appreciates the opportunity to have provided our services on this project. Please contact us if you should have questions regarding this information or if we may be of further assistance.

Thank you,

**TM Engineering, Inc. (C3201)**
