Fuquay-Varina, NC

Activity Number: 7

Date: 08/04/2026

Weather: Cloudy

Temperature: 82

NOVA Representative: Randall Greer

General Contractor: RLC Construction Company, Inc.

A NOVA representative visited the project site to pick up the compressive strength test specimens (cylinders) cast during the concrete placement on 8/03/2026. One set of 5-4" x 8" concrete compressive strength test specimens was found at the testing location on the jobsite and visually appeared to be undisturbed. The test specimens were recovered from the jobsite and secured for transporting to the local NOVA Engineering laboratory for final curing and compressive strength determination. The Concrete Compressive Strength Test Reports will be presented under separate cover as they become available.

No observations, tests, inspections or approvals by NOVA shall relieve the Contractor from his obligation to perform the Work in strict conformity with the Contract Documents. NOVA's inspections and/or tests reported herein are in no way a guarantee of deficient-free construction. The information provided herein is intended for the sole and exclusive use of our Client unless other written agreement is entered into by NOVA and other parties. All other recipients are provided this document and any corresponding tests and/or inspection results for information purposes only, and any use of said information shall be at their sole risk.
