Affidavit for Worker's Compensation N.C.G.S. 87-14

The undersigned applicant being the:

General Contractor Owner Officer/Agent of the Contractor or Owner

Do hereby confirm under penalties of perjury that the person(s), firm(s) or corporation(s) performing the work set forth in the permit:

Has three (3) or more employees and has obtained workers' compensation insurance to cover them.

Has one (1) or more subcontractors(s) and has obtained workers' compensation insurance to cover them.

Has one (1) or more subcontractors(s) who has their own policy of workers' compensation insurance covering themselves.

Has no more than two (2) employees and no subcontractors.

While working on the project for which this permit is sought it is understood that the Central Permitting Department issuing the permit may require certificates of coverage of worker's compensation insurance prior to issuance of the permit and at any time during the permitted work from any person, firm or corporation carrying out the work.

Project: 4066 Bunnlevel Erwin Rd.
Location: Erwin, NC
Company: Nate Sides
Care Of: Tyler Benson
Subject: Roof Repairs

As requested, A A Takla Engineering visited the above referenced site on September 27th, 2018, to evaluate the structural condition of the left end section of roof and gable end wall which has recently been impacted by a fallen tree. I performed a visual inspection of the damaged area from within the attic, within livable interior areas, and at exterior elevation (left).

Based on observations and evaluations we found the following:

- 1) (3) rafters front of the ridge have been significantly fractured or completely broken.
- 2) Collar ties at same (3) rafters were separated.
- 3) Ridge was slightly offset.
- 4) Purlin bracing the gable wall was separated.
- 5) Roof sheathing at this section was completely destroyed.
- 6) Left end gable wall was completely destroyed.
- 7) No impact to ceiling framing was observed.
- 8) No damage to wall framing lower than ceiling elevation was observed.
- 9) No impact to the foundation system was observed.

To restore structure to conditions prior to the tree's impact, we recommend:

- 1) Re-framing the left 3 most rafters.
- 2) Re-attach the left 3 most collar ties.
- 3) Re plum, level, and straighten the ridge.
- 4) Re-attach purlin bracing for gable end wall.
- 5) Re-build entire gable end wall (front to back).
- 6) Re-install sheathing and shingles.

Limitations of Inspection: *Services provided are in accordance with the standard of practice for structural engineering and within the limits imposed by scope, schedule and budget. The determinations contained in this report are based on conditions observed at the time of the evaluation. No guarantees or warranties, expressed or implied, under this Agreement or otherwise, shall be construed in connection with services provided. Sequencing, shoring, means and methods of construction are considered beyond the scope of this report.*
