Roof Truss Modification

Based on the request of the Harnett County Inspector, I am providing verification of the existing roof and bonus room truss design. This home is a modular home. However, the roof and bonus room design are not a true one piece roof truss system. It was built in the field and assembled on site.

I based the design and construction sequence shown on the plans and turned in for review on what I looked at on site. The roof, wall, and floor designs for the renovated 2nd floor are bearing correctly. This plan meets all the requirements of the 2018 North Carolina Building Code for Residences.
