John Johnson, Contractor

Dear Sir/Madam,

I made an onsite visit to the above referenced residential building site on January 7, 2020. The purpose of the visit was to inspect the existing footing that was not inspected by the Inspections Dept. I did several probes with a 1/2" probe rod and also used a penetrometer and got consistant readings of 2000 lbs or more. The footing will support the live, wind and dead loads per the NC State Residential Building Code, 2018,ed.

If you have any questions please feel free to call me at 774-6074.

Sincerely,

Robert J. Bracken, P.E.
