JS Consulting & Design, PLLC (JSCD) evaluated the footings for the covered porch to the rear of the above referenced site. The evaluation was based on photographs emailed to JSCD by Ms. Vazquez on April 29, 2020 and text messages.

It is understood that the foundations were excavated to a depth of 2 feet below the existing ground surface. It is also understood that each of the 6x6 posts were embedded 2 ft. into the concrete. Based on the photographs sent to JSCD the foundations are 4 ft. by 4 ft. Based on this information the dimensions of the foundations meet or exceed the dimensions of the foundations approved by Harnett County under Permit No. BRES2003-0027 and are suitable for the support of the timber framed covered porch

If you have any questions regarding this information, please do not hesitate to contact us.
