Re: Engineering Recommendation
Charles Smith - 2530 Norrington Rd Lillington, NC 27546
Project Number: GFE-22-44C
Engineering REF: GFE-22-5

To Whom It May Concern:

A representative of Ground Force Engineering, PLLC has performed a visual evaluation of the installation logs provided for validation of the install.

We have reviewed the installation of the 5 helical piles installed by Ram Jack. Each helical pile was installed to a minimum 25 kips bearing capacity per Ground Force Engineering, design dated 1-4-22. The helical piles and support brackets were installed per the manufacturers specifications and are adequate to support the design loading of the structure.

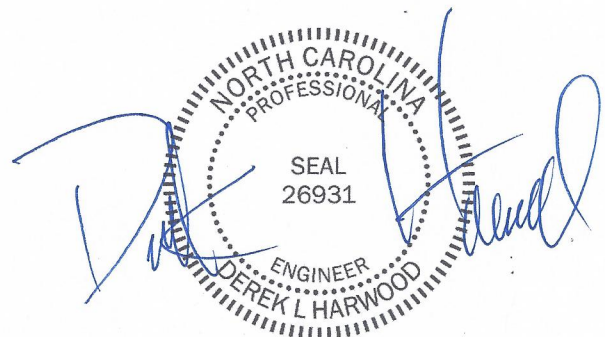

The scope of services did not include subsurface exploration or exposing any concealed elements of the structure. Please contact Ground Force Engineering, PLLC immediately if conditions are different than those indicated or encountered during implementation of recommended repairs.

Should you have any other questions, please do not hesitate to contact me.
