**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

It's showing the distance to be 15' total which would not meet the 20' required. Even if the placement on the drawing is right, on the 20' line they would have to do a survey because it's within the 10% required 2'.

Thanks,  
Landon Chandler

Landon, can you look at their site plan that they submitted? It looks as though it may meet side setbacks.
