This is a permit application for construction of an 11x29 Lean-To roof and screen/window enclosure. The roof line will mesh with the existing roof but will not be supported by the existing roof. There will be a front and rear beam supporting the structure, basically free-standing.

There is an existing 12x24 patio built within 5 feet of the septic tank to the left including the existing patio. This structure will be deconstructed entirely in conjunction with the build of the new structure as most of the materials will be reused. For the septic tank environmental inspection please advise that we are aware of the improper location and the deconstruction has already begun. Per the instructions the septic lid will be accessible unless otherwise stated.

If there are any questions please contact Rodney Bryant, 910-988-7089
