Detached Garage Footings and Slab Inspection Letter  
Harnett County Permit #: BRES2207-0023

Based on the request of the Homeowner, I inspected the expanded footings and the slab prep of the monolithic concrete slab for code compliance. My assessment and recommendations are as follows:

- The footings under the monolithic slab were excavated to the proper size and depth as shown in the plans. The 2 - #4 bars were installed in the footings as recommended. The footings have the proper density (2000 PSF). The stone and plastic for the slab has been placed as required. The Contractor has poured the concrete for the slab.

The footings, the slab prep, and the poured concrete for the monolithic concrete slab of the Detached Garage meet all the requirements of the 2018 North Carolina Building Code for Residences.
