Re: Engineering Recommendation
Brad D. Cummings Construction - 230 Whit Ct, Angier, NC 27501
Project Number: GFE-22-404C

To Whom It May Concern:

We have reviewed the installation of the 6 pipe piers installed by Ram Jack. Each pipe pier was installed with 16" x 16" x 10" concrete footings, 12" below grade. The pipe piers and support brackets were installed to the manufacturers specifications and are adequate to support the design loading of the structure.

The scope of services did not include subsurface exploration or exposing any concealed elements of the structure. Please contact Ground Force Engineering, PLLC immediately if conditions are different than those indicated or encountered during implementation of recommended repairs.

Should you have any other questions, please do not hesitate to contact me.
