November 5, 2025
Project #2216

This document is submitted in addition to the "Notice of Intent to Construct" submittal package previously supplied to the local health department in pursuant to G.S. 130A-336.1

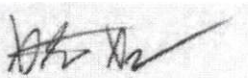

RE: 12 Twin Oaks Drive - Angier, NC 27526 – (Harnett County, NC PIN# 0663-72-1749)

To whom it may concern:

This letter is to notify Harnett County Environmental Services that the construction/modification of the wastewater system has been completed. The system was modified to acceptable construction standards. The installation was constructed in conformance to the original construction documents. This document may serve as "Authorization to Operate" the installed system.

Operation and Management Program

Have the effluent filter in the septic tank cleaned periodically by a professional. Have the solids pumped out of the septic tank every 3-5 years by a professional. Maintain adequate vegetative cover over the drainfield. Keep surface waters away from the tank and drainfield. Do not pour grease or oil down the sink. Contact a professional for periodic maintenance.

RE: 18 Twin Oak Drive - Angier, NC - 3-bedroom Single Family Residence (Harnett County PIN: 0663-72-1749)

To whom it may concern:

Adams Soil Consulting (ASC) conducted a preliminary soil evaluation on the above referenced parcel to determine the areas of soils which are suitable for subsurface wastewater disposal systems (conventional & LPP). The soil/site evaluation was performed using hand auger borings during moist soil conditions based on the criteria found in the State Subsurface Rules, 15A NCAC 18E .0101. From this evaluation, ASC is providing the attached septic system relocation design for the existing home.

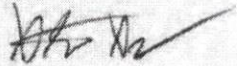

The suitable soils found on the subject property were somewhat consistent in the repair areas. The area designated for the initial/primary septic system (see attached septic plan) was found to contain soils with greater than 24 inches in depth before a restrictive horizon was encountered.

The septic installer contractor shall install the primary system on contour, see attached site plan for the repair design. No underground utilities, water lines, or sprinkler systems shall be placed into the repair septic areas. The trenches must be installed in the same location as the site plan. Contact Alex Adams at 919-414-6761. A preconstruction conference is required with the septic installer prior to construction activities at least 14 days in advance of construction activities.

This report does not guarantee the future function of any waste water disposal system installed.

If you have any questions regarding the findings on the attached site plan or in this report, please feel free to contact me anytime.

Sincerely,

Alex Adams
