Narrative description of proposed addition:

Adding a 10ft x 16ft lofted shed in the backyard to house yard equipment and additional tools. The shed will be placed in the Southeast Corner of the property at the base of the embankment. The shed will be a max of 8 feet tall and will be built 10ft from the Southwest shared fence line (Claire's) and 25ft from the rear of the property (per building setback requirements). This shed will be built approximately 10 feet into the hillside to maximize yard space, yet not disturb storm water drainage patterns. The embankment does not exceed the slope ratio soil type (hard clay) on this property, thus not requiring a retaining wall.
