TE&D Project No.: 2501-020827_A

To Whom It May Concern:

As requested, a representative of Tyndall Engineering & Design, PA (TE&D) revisited the site to observe the following item(s):

- 1) Analyze and inspect the repairs made to the manufactured home at the above-noted address, in reference to our previous report dated December 11, 2025. The previous report contained items to be addressed, numbered 1 through 4.

The following observations were noted:

- 1) It was observed that Item 1 was addressed in conformance with our previous letter. This repair will provide the required support for the anticipated loading conditions.

Item 2 and Item 3 did not require additional structural modifications. Item 4 referenced a footing around the perimeter of the manufactured home, for a proposed 4" brick skirt. At the time of our revisit, the homeowner has not made a final decision on whether to add this skirt. As such, there was not a footing to observe at this time. A footing may be added in the future, if it is excavated in conformance with our previous letter.

We appreciate being able to assist you during this phase of the project. If you need further assistance or require additional information, please do not hesitate to contact us.

Sincerely,
Tyndall Engineering & Design

Tripp Amos
