Subject: Deer View Building Permit Submission

To: kishab726@gmail.com <kishab726@gmail.com>

Ms. Shields:

Good Afternoon! After a site visit there did not seem to be a stream on the property. I am not qualified to determine the presence of a stream or not, but after talking with NCDEQ, they were comfortable with the submission of a building permit if there, in my opinion, wasn't a stream on the property. They do not have the resources to visit the site at this time. There is a caveat that we will need on the site plan submittal, that if during land disturbance there appears to be a stream or wetlands on the property, that all work will stop and that further review be required for the building permit to meet additional requirements. We look forward to working with you.
