**Please read our following Terms & Policy. You as the buyer will understand and be aware of our Terms & Policy. Our Terms indicate that you are aware and agree our conditions and terms.**

**Amplify Buildings LLC wants you as the buyer or company to understand our policy terms are important to our customers as important it is to us.**

*Amplify Buildings LLC is not responsible for filing any local & state permits needed for your building. We are not responsible in zoning permits or any other permits. We can provide a few contact information for concrete as we have our subcontractors. The customer is also responsible for clearing the land where the building will be placed (e.g. removing poles, vehicles, toys, wires, etc.) If customer has an object near that is interfering where the building will be placed, our installers and or erectors will not start customer project until it has been removed completely from the area. The designated property must be clear and leveled. We contact our customers at least 2-3 days for a few pictures of the looks of the designated area. This is important for our company to know it is clear and dry, and there is no mess near or on it. (e.g. clear land, no mud, if mud is at its designated area it must be clear and or removed, dry because of injuries in the past.) Therefore, please provide us your photos and contact us , to begin your project. If we need to reschedule due to property mess, please let us know. If your building is 32 wide and or is 15ft eave height or taller there will be a Telescopic Lift or Lull Lift required. This reason is due to any web trusses over 32 or 15 height will require more weight over 900 lbs. In this case, a forklift is required for this job. Our company can provide it and or customer as well. If customer would like to provide the equipment lift, we must let customer know the details and specs of the equipment lift. This is required because any building over 32 wide has web trusses weighing 900 lbs. (Contact us for more information on this) Please note there is a 3.5% card fee to place order, unless told a completely different answer by the owner or management. (Please contact us more information on this.) Please note this is only for any customer purchasing a Prefabricated Steel Galvanized Tube Building. We have other policy terms for our other buildings we make as in Pre-Engineered Red Iron Buildings and Metal Wood Buildings. (Please contact us for more information on this.)*

3.5% Waived card fee. -Marlen
