Subject: 2442 Harnett Central Road  
Angier, NC 27501  
Footing Inspection Letter  
Harnett County Permit #: BRES2405-0049

Based on the request of the Contractor, I inspected the point load footings for code compliance. My assessment and recommendations are as follows:

The Contractor cut back the existing concrete slab to excavate the new point load footing. The concrete slab has been cut back. The new footings have been excavated per the plans. The rebar dowels have been installed per the plans. The new point load footings have the proper density (2000 PSF). The point load footings are acceptable. The Contractor may pour the concrete for the point load footings.

The point load footings with the rebar meet all the requirements of the 2018 North Carolina Building Code for Residences.
