Re: Structural Inspection
369 E South St
Coats, NC 27521

Dear Sirs:

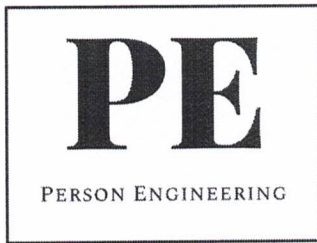

An inspection has been performed on the LVL beams for the rebuilt carport at the location described above. Upon review and calculations, the LVL beams supporting the carport framing are structurally adequate to support the loads imposed by the North Carolina Residential Code, 2018 edition.

This inspection was limited to the observation and recording of the size and placement of the LVL beams in the carport only. The review is limited to the LVL wood beams capacity. No other evaluations have been performed on its supporting structure.

Sincerely,

Travis M. Person, PE
