Date

**\*\*This application expires 6 months from the initial date if no permits have been issued\*\***

Asbestos requirements are applicable if the occupancy use is or changes to Commercial (not residential), or if multiple structures are being demolished & removed at one time.

---

An Asbestos Inspection Report prepared by an N.C. Accredited Asbestos Inspector must be provided with application to demolish any building including residences demolished for commercial or industrial expansion or structures. It is the contractor's responsibility to properly notify the Department of Health and Human Services Division of Public Health – Health Hazards Control Unit at least ten (10) working days before the demolition is to begin whether or not the building is known to contain asbestos.

I hereby certify that the information on this application is correct and that all work in connection with the above referenced job will be performed under my supervision and that such work complies with the requirements of the NC State Building Codes and applicable Harnett County Ordinances. Call for inspection at proper stage of work.

August 19, 2024

Mr. Cecil Holcomb - Cecil Holcomb Demolition  
8315 La Matisse Road, Raleigh NC 27615

Subject: Asbestos Containing Building Material Survey  
630 Spence Mill Rd. Fuquay-Varina, NC

Dear Mr. Holcomb:

Bar-Lyn Enterprises, Inc, was contracted to conduct Asbestos Containing Building Material Survey for the reference site. The survey for 630 Spence Mill Rd. Fuquay-Varina, NC was conducted on August 14, 2024.

Bar-Lyn Enterprises, Inc understands that the subject is scheduled for selective renovation or demolition. In order to facilitate the renovation or demolition, Bar-Lyn Enterprises, Inc performed a survey to identify asbestos containing materials which are required to be removed prior to renovation or any demolition activities.

The survey was performed by Bar-Lyn Enterprises, Inc inspector Peter Mitchell (NC Accredited Inspector #13224). The survey began with a visual inspection of accessible areas for the presence of suspect asbestos containing materials. Both friable and nonfriable suspect asbestos containing material were considered during the course of the survey.

Bar-Lyn Enterprises, Inc. collected Six (6) Suspect Asbestos Bulk Samples. The samples were submitted Carolina Environmental, Inc. for analyses using polarized light microscopy. A tabular summary of the analytical results is provided in attachment. The US Environmental Protection Agency (EPA) classifies material containing more than 1% asbestos as ACM. The materials found to contain regulated levels of ACM are listed below:

After reviewing data from the samples taken, none of the materials were found to contain asbestos for the 5 Bay Equipment Shelter, Shop / W Attached Lean-Too's, Collapsed Barn.

**5 Bay Equipment Shelter**

Material	General Location	Type and Percentage of Asbestos Present	Approximate Amount
None			

**Shop / W Attached Lean-Too's**

Material	General Location	Type and Percentage of Asbestos Present	Approximate Amount
None			

**Collapsed Barn**

Material	General Location	Type and Percentage of Asbestos Present	Approximate Amount
None			

**\*Note: There were no suspected asbestos containing materials identified for Garage, Shed, Tobacco Barn, Well, Septic/Water Storage Tank.**

**F=Friable NF=Non Friable**

Any demolition/renovation work in which ACM is disturbed must be in compliance with EPA, OSHA and the State of North Carolina regulations. Please note that the asbestos abatement contractor must notify the North Carolina Department of Health and Human Services (HHS) ten (10) days prior to the disturbance of ACM if it is friable or becomes friable and greater than or equal to 160 square feet, 260 linear feet or 35 cubic feet.

Please contact our office should you have any additional questions.

Respectfully,  
 BAR-LYN ENTERPRISES, INC.
