NARRATIVE (2)

Narrative Title: NFIRS

Narrative Author: Hanway, Ashton

Narrative Date: 11/01/2023 08:21:25

Narrative Apparatus ID: E241

Narrative:

Command/ Initial Observations:

District 2 was dispatched to 3375 Thompson Road for an outside fire. Upon arrival E241 found a large woods fire with structures endangered, 241 established Thompson Road command. Upon initial investigation there were structures found to be endangered and prompted an upgrade to a structural fire response and due to the amount of woodland area on fire a brush truck was requested along with forestry.

Actions Taken:

See additional narratives for Wildland Fire and Structure Fire reporting purposes.

Accountability:

Accountability officer maintained visual and verbal contact with all personnel throughout the duration of the incident and conducted personnel accountability checks throughout the incident. A total of 34 personnel were on scene, and all accounted for at each interval.

Command Termination:

The scene was released to forestry and all mutual aid was released. 241 Terminated Thompson Road Command and all units returned to service.

NARRATIVE (3)

Narrative Title: Wildland

Narrative Author: Hanway, Ashton

Narrative Date: 11/01/2023 07:51:21

Narrative Apparatus ID: E241

Narrative:

Initial actions:

Upon arrival of 241 there was approximately 3 acres of mixed wooded and open area on fire. Fire personnel found 3 debris piles from possible land clearing to be heavily involved with fire and rapid fire growth was a result of high wind conditions at the time of the fire. The fire had also jumped the roadway to the East of Thompson Road and was spreading rapidly towards an occupied dwelling.

Fire suppression:

Fire personnel from 241 initially began with creating a perimeter between adjacent structures for structural protection while extinguishing the head of the fire that was moving towards same. Fire personnel from District 11 utilized their Brush unit to contain the fire on the East side of Thompson Road and provide structural protection until Forestry units could arrive on scene. Fire personnel from 231 assisted with containment on the west side of Thompson Road and when the single wide structure became involved began primary fire attack on the structure (See Structural Fire Narrative for Details). Upon arrival of forestry a determination was made to have a plow line placed around the entirety of the West side and East side of Thompson Road for overall containment of the fire. Under direction of forestry fire personnel from 282 cut 3 trees that were aerial hazards to fire personnel and could further complicate suppression efforts. Fire personnel from district 11 placed an engine on the North Side of the Fire line that was created and utilized fire personnel from 281 & 282 to use copious amounts of water in an attempt to suppress the large debris plies. Ultimately 25 Gallons of foam had to be used to provide a blanket to prevent further heat and fire growth. Forestry Placed a plow line around the entire fire area and the fire was under control.

Water Supply:

2032,742, Cumberland 1111, and 243 were used for a water shuttle operation that was set up at a hydrant to the South on Thompson Road and a hydrant to the North at Thompson and Mclean Chapel Church Road. Approximately 10,000 gallons of water was utilized to contain/extinguish the fire.

Agencies involved in extinguishment:

District 11

District 7

District 2

District 3

Cumberland 1111

Cumberland 2034

NARRATIVE (4)

Narrative Title: Structure

Narrative Author: Hanway, Ashton

Narrative Date: 11/01/2023 08:20:24

Narrative Apparatus ID: E241

Narrative:

Initial Observations:

Fire personnel had to transition to an offensive mode of operation of a single wide trailer that became involved as a result of the woods/wildland fire. The address of the singlewide trailer that became involved was 3370 Thompson Road. A Double wide that was on an adjacent property was also damaged as a result of the fire but only sustained exterior damage to the vinyl siding. The double wide did not have a physical address as it was placed recently for a possible new development.

Fire suppression:

Fire personnel transitioned to an offensive attack on the structure and made entry to extinguish the fire. The trailer sustained over 50% damage to its entirety. The building was unsecure and did not require forcible entry to gain access. Fire personnel were able to contain the fire to the "D" delta side of the structure and it was found to have a double roof and insulation that would not allow for total extinguishment by hose line. Fire personnel utilized a chainsaw to cut the floor and flood areas of concern. Fire personnel also utilized a piercing nozzle to breach the roof area and flood concerned areas to ensure total extinguishment of the fire. Approximately 2500 gallons of water was used to fully extinguish the fire. Thermal imaging cameras were used to verify no hot spots or extension was found throughout the structure. The fire was extinguished, and no civilian or fire personnel injury occurred as a result of fire extinguishment.

Water Supply:

2032,742, Cumberland1111, and 243 was used for a water shuttle operation that was set up at a hydrant to the South on Thompson Road and a hydrant to the North at Thompson and Mclean Chapel Church Road. Approximately 10,000 gallons of water was utilized to contain/extinguish the fire.

Agencies involved in extinguishment:

District 11 - 4 Personnel

District 7 - 3 Personnel

District 2 - 16 Personnel

District 3 - 3 Personnel

Cumberland 1111 - 2 Personnel

Cumberland 2034 - 6 Personnel

NARRATIVE (5)

Narrative Title: Foam

Narrative Author: Winpegler, Kurt

Narrative Date: 11/01/2023 10:12:59

Narrative Apparatus ID: n/a

Narrative:

25 gallons of National Foam (AR-AFFF) was used at 6%.

Personnel directly involved were.
