

# UL Evaluation Report

**UL ER5817-02**

**Issued: October 02, 2014**

**Revised: July 27 , 2018**

Visit UL's On-Line Certifications Directory: [www.ul.com/erdirectory](http://www.ul.com/erdirectory)  
for status of Report.

**UL Category Code: ULEX**

**CSI MasterFormat®**

**DIVISION: 07 00 00 – THERMAL AND MOISTURE PROTECTION**

**Sub-level 2: 07 20 00 - Thermal Protection**

**Sub-level 3: 07 21 00 - Thermal Insulation**

## **COMPANY:**

**BASF CORP STYRENIC FOAMS DIV**

**1609 BIDDLE AVE**

**WYANDOTTE, MI 48192**

<http://www.neopor.basf.us>

## **1. SUBJECT:**

**Polystyrene beads designated Neopor F5 Pro, F2200, F2300, F2400, F5300, F5300 Plus, F5200 Plus, KF2200, KF2300, KF2300S, KF2400**

## **2. SCOPE OF EVALUATION**

- 2015, 2012, 2009 and 2006 *International Building Code*® (IBC)
- 2015, 2012, 2009 and 2006 *International Residential Code*® (IRC)
- 2015, 2012 *International Green Construction Code*® (IgCC)
- ICC-ES Acceptance Criteria for Foam Plastic Insulation (AC12), dated June 2012
- ICC ES Acceptance Criteria for Quality Documentation (AC10), Dated June 2014

### **The products were evaluated for the following properties:**

- Surface Burning Characteristics (ANSI/UL723, ASTM E84)
- Physical Properties (ASTM C578)
- Roofing Systems for Exterior Fire Exposure (ANSI/UL790, ASTM E108)
- Roof Deck Construction Material With Resistance to Internal Fire Exposure (ANSI/UL1256)
- Flammability Testing for Use in Attics and Crawl Spaces (AC12, App. A and B)
- For Use on Exterior Commercial Walls (NFPA 285)
- Material Emissions (UL2818 and California Department of Public Health, CDPH/EHLB/Standard Method V.1.1)

Throughout this report, unless specifically indicated otherwise, the reference to NEOPOR Expandable Polystyrene Resins will apply to all EPS Resins described above.

### **3. REFERENCED DOCUMENTS**

- ICC-ES Acceptance Criteria for Foam Plastic Insulation (AC12), dated June 2012
- ICC-ES Acceptance Criteria for Quality Documentation (AC10), dated June 2014
- ANSI/UL723 (ASTM E84), Test for Surface Burning Characteristics of Building Materials
- ANSI/UL790 (ASTM E108), Standard Test Methods for Fire Tests of Roof Coverings
- ANSI/UL1256, Standard for Fire Test of Roof Deck Constructions
- ASTM C578, Standard Specification for Rigid, Cellular Polystyrene Thermal Insulation
- UL2818, GREENGUARD Certification Program for Chemical Emissions for Building Materials, Finishes and Furnishings
- NFPA 285, Standard Fire Test for Evaluation of Fire Propagation Characteristics of Exterior Non-Load-Bearing Assemblies Containing Combustible Components
- California Department of Public Health, CDPH/EHLB/Standard Method V.1.1

### **4. USES**

The expandable polystyrene resins designated as BASF NEOPOR are used by independent manufacturers to produce expanded polystyrene (EPS) insulation products. See [Table 6](#) for a list of molders under the BASF Neopor Brand Marketing Agreement that utilize BASF NEOPOR resins in their UL Certified end-use products.

### **5. PRODUCT DESCRIPTION**

EPS insulation products manufactured with expandable polystyrene resins are produced through the introduction of heat, without other additives. The process expands the resins, which are then molded into insulation products at the densities and thicknesses specified in this report. Finished boards manufactured from these resins at the maximum densities and thicknesses indicated in Table 1 are qualified to bear a label with a flame-spread index of 25 or less and a smoke-developed index of 450 or less when tested in accordance with ANSI/UL723 (ASTM E84), provided the finished boards are listed and labeled by an approved agency.

NEOPOR expandable polystyrene resins have been qualified in accordance with Section 4.5.15.1.1 of the ICC-ES Acceptance Criteria for Foam Plastic Insulation (AC12). The resins can be used to produce EPS insulation products that comply with the ASTM C578 properties described in Table 2, provided the finished EPS insulation products are listed and labeled by an approved agency.

NEOPOR expandable polystyrene resins have been qualified for use in producing EPS insulation products as a roofing insulation as follows:

- As part of a UL Classified Class A, B or C roof-covering assembly in accordance with UL 790, and
- As part of a UL Classified Roof Deck Construction in accordance with UL 1256

NEOPOR expandable polystyrene resins have been qualified for use in producing EPS insulation products on the exterior of above grade walls as follows:

- Exterior Walls of One- and Two-Family Dwellings in accordance with the 2012 IRC,
- Exterior walls of one story buildings of Types I, II, III, or IV construction in accordance with Section 2603.4.1.4 of the IBC,
- Exterior walls of Type V construction in accordance with Section 2603.2, 2603.3, and 2603.4 of the IBC, or
- Exterior walls of buildings more than one story of Types I, II, III, or IV construction in accordance with Section 2603.5 of the IBC, when part of a UL Classified Exterior Wall System in accordance with NFPA 285. See Table 4

NEOPOR expandable polystyrene resins have been found to comply with IgCC Section 806.6 for insulation for material emissions and Section A108.5 Total VOC limit project elective. Refer to UL's [GREENGUARD GOLD](#) certification of these products.

**Table 1a – Maximum Insulation Board Density and Thickness for UL723**

BEAD TYPE	MAXIMUM DENSITY (lb/ft <sup>3</sup> )	MAXIMUM THICKNESS (In.)	Flame Spread *	Smoke Developed *
Neopor F2200, F2300, F2400, F5200 Plus, F5300, and F5300 Plus, KF2200, KF2300, KF2300S, KF2400	2.0	6	5	25

# Flame spread and smoke developed recorded while material remained in the original test position. Ignition of molten residue on the furnace floor resulted in flame travel equivalent to calculated flame spread index of 175 and smoke developed index of over 500.

**Table 1b – Maximum Insulation Board Density and Thickness for UL723**

BEAD TYPE	MAXIMUM DENSITY (lb/ft <sup>3</sup> )	MAXIMUM THICKNESS (In.)	Flame Spread *	Smoke Developed *
Neopor F5 Pro	3.0	6	25	40

# Flame spread and smoke developed recorded while material remained in the original test position. Ignition of molten residue on the furnace floor resulted in flame travel equivalent to calculated flame spread index of 175 and smoke developed index of over 500.

**Figure 1 – BASF NFPA 285 Wall Design**

## **6. INSTALLATION**

### **6.1 General:**

Installation of finished EPS insulation products manufactured from NEOPOR expandable polystyrene resins must be installed in accordance with the finished EPS manufacturer's installation instructions and in accordance with IBC Section 2603 of the 2015, 2012, 2009 or 2006 code, IRC Section R316 of the 2015, 2012 and 2009 code, and/or Section R314 of the 2006 code, as applicable.

## 6.2 Attics and Crawl Spaces:

Finished EPS insulation boards produced from NEOPOR resins may be used on walls of attics and crawl spaces at maximum thicknesses described in Table 5, without the coverings specified in IBC Section 2603.4.1.6 of the 2015, 2012, 2009 or 2006 code, or IRC Sections R316.5.3 or R316.5.4 of the 2015, 2012 and 2009 code or R314.5.3 or R314.5.4 of the 2006 code, as applicable, provided all of the following conditions are met:

- Entry to the attic or crawl space is only for service utilities, and no storage is permitted.
- There are no interconnected attic or crawl space areas.
- Air in the attic or crawl space must not be circulated to other parts of the building.
- Attic ventilation is provided when required by IBC Section 1203.2 of the 2015, 2012, 2009 or 2006 code or IRC Section R806 of the 2015, 2012, 2009 or 2006 code, as applicable. Under-floor (crawl space) ventilation is provided when required by IBC Section 2304.11.9 of the 2015, 2012, 2009 or 2006 code or, IRC Section R408.1 of the 2015, 2012, 2009 or 2006 code, as applicable.
- Combustion air is provided in accordance with Section 701 of the 2015, 2012 and 2009 IMC or Sections 701 and 703 of the 2006 IMC.

**Table 5 – Type and Maximum Thickness for EPS Products Used in Attics and Crawl Spaces**

NEOPOR GRADE DESIGNATION	ASTM C578 EPS TYPE	MAXIMUM THICKNESS (INCHES)
F5 PRO, F5300, F5300 PLUS, F5200 PLUS, KF2200, KF2300, KF2300S, KF2400	I	4.0
F2200, F2300, F2400, F5300, F5300 PLUS, F5200 PLUS KF2200, KF2300, KF2300S, KF2400	VIII	3.2
F2200, F2300, F2400, F5300, F5300 PLUS, F5200 PLUS KF2200, KF2300, KF2300S, KF2400	II	2.66
F5 PRO, F2200, F2300, F2400, F5300, F5300 PLUS, F5200 PLUS KF2200, KF2300, KF2300S, KF2400	IX	2.0
F5 PRO	XIV	1.5
F5 PRO	XV	1.2

## 6.3 Exterior Insulation and Finish Systems (EIFS):

Finished EPS insulation boards produced from NEOPOR resins may be used as a component of the BASF Corporation – Wall Systems [Senerflex Platinum CI](#), [Pebbletex Platinum CI](#) and [Acrotex Platinum CI](#) EIFS when installed in compliance with IBC Section 1408 of the 2015, 2012 and 2009 code or IRC Section R703.9 of the 2015, 2012 and 2009 code, as applicable.

## 6.4 Stucco with Continuous Insulation

Finished EPS insulation boards produced from NEOPOR resins may be used as a component of the BASF Corporation – Wall Systems [Senergy](#), [Finestone](#) and [Acrocrete](#) Platinum CI Stucco, Platinum CI Stucco Plus and Platinum CI Stucco Ultra systems when evaluated for that purpose.

## 7. CONDITIONS OF USE

The BASF NEOPOR expandable polystyrene resins described in this report comply with, or are suitable alternatives to what is specified in, those codes listed in Section 2 of this report, subject to the following conditions:

- 7.1 The density and thickness of the insulation boards must be as noted in Sections 5 and 6 of this report.
- 7.2 Finished EPS insulation products manufactured from the resins must be listed and labeled by an approved agency.
- 7.3 Except as noted in Section 6.2 of this report, finished insulation products manufactured from the resins must be separated from the building interior by a thermal barrier complying with IBC Section 2603.4 of the 2015, 2012, 2009 or 2006 code, IRC Section R316.4 of the 2015, 2012 and 2009 code and/or Section R314.4 of the 2006 IRC, as applicable.
- 7.4 For a listing of applicable UL Certifications for EPS boards manufactured from NEOPOR expandable polystyrene resins, see the Online Certifications Directory for the following categories.
  - See UL Online Certifications Directory for Foamed Plastic, UL Classified for Surface Burning Characteristics in accordance with UL723 ([BRYX](#)).
  - See UL Online Certifications Directory for Foamed Plastic, Component ([BRYX2](#)).
  - See UL Online Certifications Directory for Polystyrene Thermal Insulation, Rigid Cellular, UL Classified in accordance with ASTM C578 ([QORW](#)).
  - See UL Online Certifications Directory for Class A, B or C roof-covering assemblies UL Classified in accordance with UL 790 ([TGFU](#)).
  - See UL Online Certifications Directory for Roof Deck Constructions for assemblies UL Classified in accordance with UL 1256 ([TJBX](#)):
  - See UL Online Certifications Directory for Exterior Walls for assemblies UL Classified in accordance with NFPA 285 (FWFO):
    - Exterior Wall System [EWS0025](#)
    - Exterior Wall System [EWS0026](#)
- 7.5 See UL GREENGUARD Certification, [GreenGuard Neopor](#)
- 7.6 The resins are produced by BASF SE in Ludwigshafen, Germany and BASF BK in Ulsan, South Korea under the UL LLC Recognition and Follow-Up Service Program, which includes regular audits in accordance with quality elements of ICC-ES Acceptance Criteria for Quality Documentation, AC 10.

## 8. SUPPORTING EVIDENCE

- 8.1 Data in accordance with ICC-ES Acceptance Criteria for Foam Plastic Insulation (AC12), dated June 2012, including data in accordance with Appendix A and B of AC12.

- 8.2 UL Certifications for finished EPS boards manufactured from BASF NEOPOR resins in accordance with UL 723, ASTM C578, UL 790, UL 1256, and NFPA 285. See UL Product Certification Categories (BRYX), (QORW), (TGFU), (TJBX), and (FWFO) respectively, as described in 7.4.
- 8.4 GREENGUARD Certification for Material Emissions. See UL GREENGUARD Certification, [GreenGuard Neopor](#).
- 8.5 Documentation of quality system elements described in AC10.

**9. IDENTIFICATION**

The BASF NEOPOR expandable polystyrene resins described in this evaluation report are identified by a marking bearing the report holder’s name (BASF Corp), the plant identification, the UL Component Recognition Mark, and the evaluation report number UL ER5817-02. The validity of the evaluation report is contingent upon this identification appearing on the product.

**10. BASF AND MOLDER NEOPOR BRAND MARKETING AGREEMENT**
