**Subject:** Re: 66 Mels Meadow

The total square footage of the addition is 210.

The enclosed addition is an extension to the master bedroom.

The total renovated square footage is 1680.

The scope of work is a total renovation of the downstairs area, including baths and kitchen. New appliances, fixtures in baths, insulation in walls, new drywall on walls and ceilings, and new lvt flooring. The downstairs will also be rewired.

If I can make any further clarifications, I can be reached at 9197958872.

Good afternoon! I have a few questions in regards to your current project. On the land use you have 15x15 addition and downstairs renovation... what is the total sq footage of the addition? What does the addition include? What is the sq footage of the downstairs renovation area?? I'll also need a scope of work.

Sincerely,

**Kimberly Gibbons**
