**HEALTH AND
HUMAN SERVICES**

ROY COOPER • Governor
KODY H. KINSLEY • Secretary
MARK BENTON • Chief Deputy Secretary for Health
SUSAN KANSAGRA • Assistant Secretary for Public Health
Division of Public Health

Application for Services

This application, in conjunction with the common form established in G.S. 130A-335(a3) and (a5), is optional for local health departments to be used for applications submitted in accordance with G.S. 130A-335(a2), (a3), and (a5).
[hereinafter, G.S. 130A-335(a3) and (a5) permits referred to as (a2) Improvement Permit and (a2) Construction Authorization]

Applying for:

- (a2) Improvement Permit (a2) Construction Authorization (a2) Repair/Construction Authorization

If applying for a Construction Authorization, please indicate desired system type(s):

- Accepted Conventional Innovative Other _____ Any

- New Construction Expansion System Relocation Change of Use Repair
 5-Year Expiration Requested (site plan provided) Non-Expiring Permit Requested (plat provided, defined in G.S.130A-334(7a))
Requesting DHHS review? (systems >3000 GPD or IPWW) Yes No

Applicant: Clayton Homes of Raleigh
Mailing Address: 3912 Fayetteville Road

City: Raleigh
State: NC **Zip:** 27603
Phone #: 919-772-5013
Email: hc781@claytonhomes.com

Owner: Clayton Homes of Raleigh
Mailing Address: 3912 Fayetteville Road

City: Raleigh
State: NC **Zip:** 27603
Phone #: 919-772-5013
Email: hc781@claytonhomes.com

If the answer to any of the following questions is "yes", applicant must attach supporting documentation.

Yes No Does the site contain any jurisdictional wetlands?
 Yes No Is any wastewater going to be generated on the site other than domestic sewage?
 Yes No Is the site subject to approval by any other public agency?
 Yes No Are there any easements or right of ways on this property?

I understand that the documentation and fees, as required in G.S. 130A-335(a2), (a3), (a5), and (a6), attached to this application are to be used to issue an Improvement Permit and/or Construction Authorization pursuant to G.S. 130A-335(a2),(a3), and (a5). I understand that authorized county and state officials are granted right of entry to the property indicated on this application to conduct necessary inspections to determine compliance with applicable laws and rules. ***I understand that if the information in the application for an Improvements Permit and/or Construction Authorization is falsified, changed, or the site is altered, then the Improvement Permit and Construction Authorization shall become invalid.***

G.S. 130A-335(a3) states the following:

When an applicant for an Improvement Permit submits to a local health department an Improvement Permit application, the permit fee charged by the local health department, the common form developed by the Department, and a soil evaluation pursuant to subsection (a2) of this section, the local health department shall, within five business days of receiving the application, conduct a completeness review of the submittal. A determination of completeness means that the Improvement Permit includes all of the required components. If the local health department determines that the Improvement Permit is incomplete, the local health department shall notify the applicant of the components needed to complete the Improvement Permit. The applicant may submit additional information to the local health department to cure the deficiencies in the Improvement Permit. The local health department shall make a final determination as to whether the Improvement Permit is complete within five business days after the local health department receives the additional information from the applicant. If the local health department fails to act within any period set out in this subsection, the applicant may treat the failure to act as a determination of completeness. The Department shall develop a common form for use as the Improvement Permit.

The review for completeness of this Improvement Permit was conducted in accordance with G.S. 130A-335(a3). This Improvement Permit is determined to be:

Incomplete (If box is checked, information in this section is required.)

This Improvement Permit is issued pursuant to G.S. 130A-335 (a2) and (a3) using the signed and sealed LSS/LG evaluation(s) attached here. The issuance of this permit in no way guarantees the issuance of other permits. The permit holder is responsible for checking with appropriate governing bodies in meeting their requirements. *This permit is subject to revocation if the site plan, plat, or the intended use changes.* The Improvement Permit shall not be affected by a change in ownership of the site. This permit is subject to compliance with the provisions of 15A NCAC 18E and to the conditions of this permit.

The Department, the Department's authorized agents, and the local health departments shall be discharged and released from any liabilities, duties, and responsibilities imposed by statute or in common law from any claim arising out of or attributed to evaluations, submittals, or actions from a licensed soil scientist or licensed geologist pursuant to GS 130A-335(a2).

Initial submittal received: _____ by _____
Date Initials

G.S. 130A-335(a5) states the following:

When an applicant for a Construction Authorization, or an Improvement Permit and Construction Authorization together, submits a Construction Authorization, or an Improvement Permit and Construction Authorization application together, the permit fee charged by the local health department, the common form developed by the Department, and any necessary signed and sealed plans or evaluations conducted by a person licensed pursuant to Chapter 89C of the General Statutes as a licensed engineer or a person certified pursuant to Article 5 of Chapter 90A of the General Statutes as an Authorized On-Site Wastewater Evaluator, the local health department shall, within five business days of receiving the application, conduct a completeness review of the submittal. A determination of completeness means that the Construction Authorization or Improvement Permit and Construction Authorization includes all of the required components. If the local health department determines that the Construction Authorization or Improvement Permit and Construction Authorization is incomplete, the local health department shall notify the applicant of the components needed to complete the Construction Authorization or Improvement Permit and Construction Authorization. The applicant may submit additional information to the local health department to cure the deficiencies in the Construction Authorization or Improvement Permit and Construction Authorization. The local health department shall make a final determination as to whether the Construction Authorization or Improvement Permit and Construction Authorization is complete within five business days after the local health department receives the additional information from the applicant. If the local health department fails to act within any period set out in this subsection, the applicant may treat the failure to act as a determination of completeness. The applicant may apply for the building permit for the project upon the decision of completeness of the Construction Authorization or Improvement Permit and Construction Authorization by the local health department or if the local health department fails to act within five business days. The Authorized On-Site Wastewater Evaluator or licensed engineer submitting the evaluation pursuant to this subsection may request that the local health department revoke or suspend the Construction Authorization or Improvement Permit and Construction Authorization for cause. Upon written request of the Authorized On-Site Wastewater Evaluator or licensed engineer, the local health department shall suspend or revoke the Construction Authorization or Improvement Permit and Construction Authorization pursuant to G.S. 130A-23. The Department shall develop a common form for use as the Construction Authorization.

The review for completeness of this Construction Authorization was conducted in accordance with G.S. 130A-335(a5). This Construction Authorization is determined to be:

Incomplete (If box is checked, information in this section is required.)

State Authorized Agent: _____ Date of Issuance: _____

This Construction Authorization is issued pursuant to G.S. 130A-335(a2) and (a5) using the signed and sealed plans or evaluations attached here. This Construction Authorization is subject to revocation if the site plan, plat, or the intended use changes. The Construction Authorization shall not be affected by a change in ownership of the site. This Construction Authorization is subject to compliance with the provisions of the Laws and Rules for Sewage Treatment and Disposal and to the conditions of this permit.

The Department, the Department's authorized agents, and the local health departments shall be discharged and released from any liabilities, duties, and responsibilities imposed by statute or in common law from any claim arising out of or attributed to plans, evaluations, preconstruction conference findings, submittals, or actions from a person licensed pursuant to Chapter 89C of the General Statutes as a licensed engineer or a person certified pursuant to Article 5 of Chapter 90A of the General Statutes as an Authorized On-Site Wastewater Evaluator in GS 130A-335(a2), (a5), and (a7). The Department, the Department's authorized agents, and the local health departments shall be responsible and bear liability for their actions and evaluations and other obligations under State law or rule, including the issuance of the operations permit pursuant to GS 130A-337.

Residential Subsurface Wastewater Treatment and Disposal System Proposal

for

**530 Pine Oak Lane – Lot 75R
Cameron, Harnett County, NC**

Parent PIN: 09956301015812
December 30, 2024

Prepared for:

Clayton Homes of Raleigh
3912 Fayetteville Road
Raleigh, NC 27603

Prepared by:

Evan T. Morgan, LSS, AOWE
Earthly Elements Soil Consulting, PLLC
PO Box 12131
Durham, NC 27709

The LSS Evaluation is being submitted pursuant to and meets the requirements of G.S. 130A-335 (a2).

This AOWE submittal is pursuant to and meets the requirements of G.S. 130A-335(a2) and (a5).

Details

Earthly Elements Soil Consulting, PLLC (Earthly Elements) has prepared a septic system design proposal for a 3-bedroom single family residence with a design daily flow of 360 gallons per day (GPD). The property is located at Lot 75R, 530 Pine Oak Lane, Cameron, Harnett County, North Carolina (Parent PIN: 09956301015812).

The property is to be served by a private well.

Based upon a soils investigation performed by Earthly Elements, it has been determined that enough "Suitable" Group II soil is available for the installation of a **Gravity to Accepted Systems** for the initial system and pump to accepted repair system both at a 0.6 GPD/ft. sq. long term acceptance rate (LTAR).

Earthly Elements requests that Harnett County Environmental Health (HCEH) issue the appropriate Improvement Permit and Construction Authorization permit for a subsurface wastewater treatment and disposal system based upon this proposal.

References

Working Copy of 15A NCAC 18E, Version 2.1, September 30, 2024; effective September 30, 2024

Primary Investigator's Credentials

NC Licensed Soil Scientist No. 1340

AOWE Certification No. 10039E

Plans and Specifications

A. Septic Tank

1. The septic tank shall be State approved, of one-piece construction, watertight, structurally sound and 1,000-gallons capacity. It is the responsibility of the septic tank contractor to thoroughly inspect each septic tank prior to accepting delivery.
2. The septic tank will be fitted with an approved effluent filter and riser for easy access and periodic maintenance.
3. The septic tank shall have secondary protection within the risers.
4. The septic tank should be installed as shallow as possible

B. Pipes and Fittings

1. All discharge piping, connectors and supply lines should be made of SCH 40 PVC.
2. All joints must be properly "welded" utilizing the appropriate PVC cement for each

application.

3. The supply line from the septic tank shall be 3-inch Schedule 40 PVC (approximate length of supply line is 5 feet).

C. Distribution Method – Serial

1. The system will be fed via serial distribution connecting at the terminal ends.

D. Drainfield Installation

1. The initial and repair drainfield and the proposed septic tank location have been marked on-site utilizing metal stemmed flags. Once this area has been approved by the LSS/AOWE, the property owner/builder should mark this area and isolate it as much as possible from construction traffic. Prior to the system installation, the septic contractor shall contact the LSS/AOWE for a preconstruction conference, if requested, at which time the drainfield area will be re-verified.
2. Under no circumstances shall any construction take place within the drainfield area while the soil is in a wet condition. If the installer has doubts as to whether the drain field area is dry enough to begin construction, the LSS/AOWE or environmental health specialist for this area should be contacted for permission to proceed with the installation.
3. The specified initial system is a Type II-B gravity to “Accepted Systems” drainline.
4. The initial drain field consists of two (2) lateral trenches 3 feet wide by 12 inches tall by 75 feet in length. The repair drain field consists of three (3) lateral trenches 3 feet wide by 12 inches tall by 35, 64 and 83 feet in length.
5. The lateral trenches are proposed to be constructed off contour with the land, with each trench bottom being excavated level from beginning to end. The use of a tripod mounted engineer’s level is essential to assure that each trench is constructed as level as possible.
6. The maximum trench depth for the initial system shall be 24 inches on the low side of the trench. The maximum trench depth for the repair system shall be 18 inches on the low side of the trench. Each trench shall be placed on minimum 9-foot on centers.
7. A minimum 6-inch soil cover, after settling, will be required over the drainfield. The cover shall extend five feet beyond the drainfield in all directions.

Initial and Repair Septic System						
Line #	Color	Field Length	System length	Initial/Repair	Setup 1	Reference Elevation
1	O	35	-	Not Used	6.82	96.56
2	R	64	64	Repair	7.7	95.68
3	W	83	83	Repair	8.6	94.78
4	Y	100	75	Initial	9.75	93.63
5	B	103	75	Initial	10.49	92.89
6	O	35	35	Repair	11.35	92.03
				SE House Corner	9.51	93.87
				SE Corner EIP	3.38	100

E. Proper Operation Check

1. After all components of the wastewater disposal system have been installed and connected, the system shall be checked for proper operation.

F. Final Landscaping

1. The finished grade over the septic tank and drainfield shall be shaped to shed rainwater and be free from low spots.
2. The entire area of the drainfield should be planted with grass as soon as possible to prevent erosion. The soil should be properly tilled, limed (if necessary) and fertilized prior to planting. After applying grass seed, the area should be heavily mulched with straw or other suitable material.

G. Utility/Drive Conflicts

1. Water lines must be kept at least ten (10) feet from any portion of the septic system.
2. Guy wires and utility poles must be kept at least five (5) feet from any portion of the septic system.
3. Irrigation systems should not be placed in the drain field area.
4. The private water supply well must maintain a minimum 100-foot setback to the septic system components.
5. The driveway should enter the property from the left side of the home.

Maintenance

H. Operation and Maintenance

The designed system is classified as a Type II-B wastewater treatment and disposal system and does not require ongoing maintenance via a certified inspector to operate subsurface wastewater systems (Section .1300 Operation and Maintenance). However, the following maintenance should be considered by the owner:

1. The septic tank shall be pumped out when the solids within the septic tank reach an elevation that is equivalent to 25% of the volume of the tank. In some situations, the tanks may need to be pumped more frequently; for example, if you are using a garbage disposal, it is recommended that the septic and pump tanks be cleaned out annually.
2. The effluent filters should be inspected semi-annually. When it becomes necessary to clean the effluent filters, the filters should be removed, and the accumulated debris washed back into the septic or pump tank – not onto the lawn.
3. All piping and valves should be inspected semi-annually for damage and corrections/repairs made immediately.
4. The drain field area should be maintained to prevent overgrowth of vegetation. Any damp areas, leakages or malfunctions should be addressed immediately.
5. Divert gutter downspouts and surface water runoff away from the septic and pump tanks.

I. Suggestions to the Homeowner

1. A garbage disposal is not recommended. The ground up garbage adds large amounts of solids into a septic tank that tend to degrade at a very slow rate.
2. Grease, cooking oils, coffee grounds and non-degradable solids (disposable diapers, cigarettes and solid paper wastes) should never be put into a septic tank.
3. Used motor oil or any oily liquids should not be disposed of in a septic tank.
4. Be aware of the amount of water that you are using in your home. Water saving fixtures and devices can be installed on sinks, toilets and showers to reduce the volume of wastewater that you are sending to your drain field.
5. Run dishwashers and washing machines only when you have a full load.
6. Repair leaky faucets and toilets. Small drips equal large volumes of water over time and can over burden your drain field.
7. Do not use chemical additives in your system. Studies have indicated that they do not increase the biological activity that naturally occurs in the septic system and in some cases certain additives have been found to be detrimental to the life of a system.
