If the bedroom total is 4 and the addition is going in the same spot that is on the permit we don't need another review

Subject: FW: 254 Mistywood Dr. Addition

This customer is applying for a bedroom addition & normally we would always send it to Environmental Health for review.

However, this customer completed an affidavit & mentioned their relocation (EH2503-0008) that had a note on the drawing about expanding from a 3 bedroom to a 4 bedroom.

But, in the fees taken for the EH2503-0008, there was an additional note added that this was for relocation.

Does this need to be sent to Environmental Health to assess if their system can handle another bedroom? Or was that also determined during the relocation?

Thank you in advance for your help!

Sincerely,

Michelle Myatt

The site plan was updated as you requested. Please see attached in reference to the septic. The septic permit states that it is going from a 3 bedroom to a 4 bedroom. The septic work has already been completed.

Thank you

Please revise your Site Plan to include the distances from each side of the proposed bedroom addition to all property lines.

Also, because the addition is a bedroom, this will need to go through Environmental Health to confirm that the septic system can handle another bedroom.

Sincerely,
