Verify licensees and sell the permits ( building and electrical)

Field inspector will handle code compliance. No need for a plan review.

Brad

Brad,

Take a look at the email below. I have also included the only paperwork they submitted.

I am assuming this is a normal BRES with subs attached, but what further plans/letters/paperwork will they need to submit so I can keep this one moving forward?

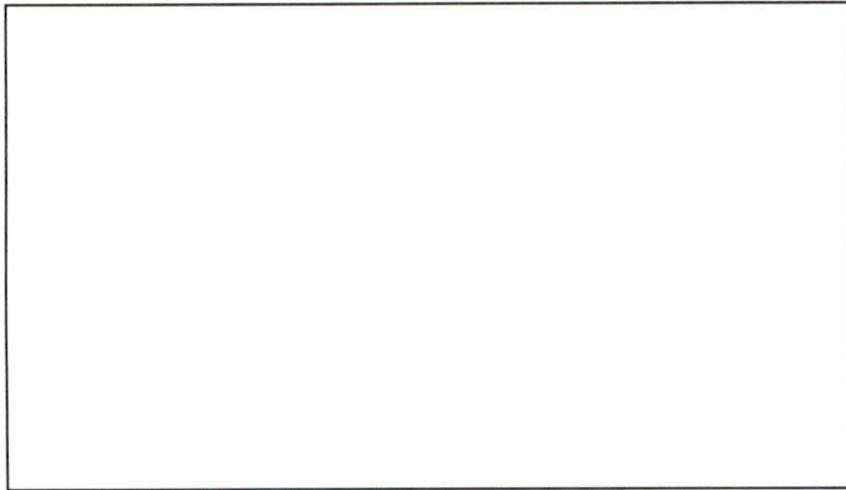

You are the best.

A vehicle partially drove through the side of the home. It damaged the left garage wall and foundation. We will have to disconnect the meter base and remove the electrical panel in order to reframe the wall. I have included a couple of pictures of the initial damage to help describe the situation. Please let me know what else you need to keep this permit application moving forward.

I tried to set up an online account to submit the permit application, but have not received a response to my voicemail. Are you able to help me with this as well?

Thank you,  
Cian Bouchard

Good Morning!

Can you further explain the reason for this permit? I know we will need additional paperwork submitted.
