----- COMMENTS AND NOTES -----

April 17, 2008

PN: 119-001

Mr. Danny Pollard  
BIM Builders, LLC  
6187 NC 27 E  
Coats, NC 27521

**RE: Foundation Investigation & Recommendations  
Linden Holiness Church  
2685 Wire Road  
Harnett County, North Carolina  
Building Permit #: 08-50019437**

Dear Mr. Pollard:

During our site visit on April 16, 2008, a subgrade inspection of the subgrade soils was performed on the proposed foundation location within the existing test pit locations.

The soils were probed with a No. 6 rebar to identify any soft soil conditions. Almost the entire footing for the two planned additions of the structure was found to be very soft.

The upper 18 to 24 inches of subgrade soil visually classifies as an Organic SILT (OH), damp, and is dark brown to grey in color. The subgrade soils from below the strata described above to approximately 36 inches below the surface visually classifies as Silty SAND, coarse in texture, wet, and is yellow/brown in color.

Within 30 minutes of performing several small borings to a depth of 36 inches, the ground water was recorded at 18 to 22 inches below the ground surface along both footing locations.

Based on the observations above and the anticipated loading of the structure, in order to provide adequate support for the proposed additions to the existing structure we make the following recommendations:

1. The footing location identified on the attached sketch should be undercut to a minimum 24" below the proposed base elevation of the concrete footing and a minimum width of 36".
2. Install one of the following woven geotextile fabrics per manufacturer's recommended installation procedures across the entire bottom of the footing excavation (min 36" wide).
  - a. Terratex GS
  - b. Mirafi 500x
  - c. TNS W200
3. This undercut shall then be backfilled with NCDOT #57 stone in 12" compacted lifts a minimum of 24 inches thick.

**P.O. Box 578  
46 W. Washington Street  
Coats, NC 27521  
Phone: 910-897-7070  
Fax: 910-897-6767**

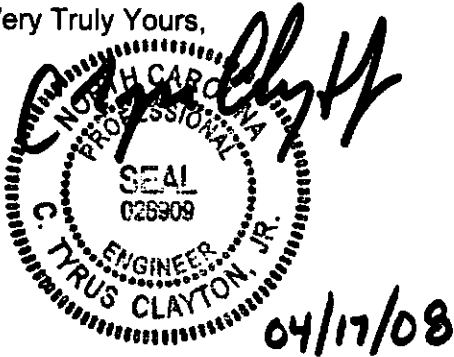

*Offices located in Coats and New Bern, North Carolina*

4. In addition, the concrete footing shall be reinforced with three rows of No. 3 rebar centered beneath the foundation wall and 2 inches off the bottom of the footing.

\*\*It is also recommended that a minimum 4" corrugated plastic pipe (CPP) drain be installed at the lowest corner of each footing to act as a foundation drain in conjunction with the #57 stone. The 4" CPP should be laid on adequate grade to facilitate drainage to a point at which the pipes can daylight.

This report has not been forwarded to the Building Inspector. Please send this in its entirety, to the Harnett County Inspections Department. If you should have any further questions, please feel free to contact me at (910) 897-7070.

Very Truly Yours,

C. Tyrus Clayton Jr., P. E.  
Vice President
