Att: Ken Slattum

Morris Chapel Church – Application # 1650039971
8533 Cox Mill Road, Sanford, NC 27330

Ken please find enclosed the Building code summary request with the drawings for the enclosure of part of the pole barn at Morris Chapel church. Sorry about the confusion on my part and please give me a call with any questions or other steps we need to make to correct the situation. I will be traveling the next 3 days but you can reach me on my cell phone at 704-608-6250.

On the building code summary a lot of the information did not pertain to the 32ft X 20ft enclosure and I hope the information I supplied is adequate.

This enclosure is mainly for storage but we will use part of it about once or twice a year for our Harvest Sale and reunion of the church. The sink we installed will be used to wash large pots and pans and during our Harvest Sale the plan is to prepare plates only and no eat in dining area.

On the enclosed drawing we have put in the new receptacles and plumbing that we added as part of the enclosure while the other electrical outlets were approved when we originally built the pole barn shelter.

Thanks again for your help on this situation and please let me know what other information you may need.

Morris Chapel Church – Application # 1650039971 (building permit application)
8533 Cox Mill Road, Sanford, NC 27330

Our church has enclosed part of a pole barn shelter for storage and have added a 3 compartment sink to use to wash large pots and pans. We did not know that we had to get a permit for the drain line from the sink and have installed a 50 gallon grease trap with about 90 feet of drain line for the sink drainage only. (the sink or drain have not been used) There are no bathrooms or other drains going to the grease trap.

I am requesting from you direction on what we need to do to correct the error and next steps to proceed with to get a permit and make sure that everything is to your code.

Please find enclosed a drawing of the enclosure of the storage enclosure showing the location of the grease trap and drain line from the sink to the grounds.

Thanks for your help on this and sorry about the confusion on our part.

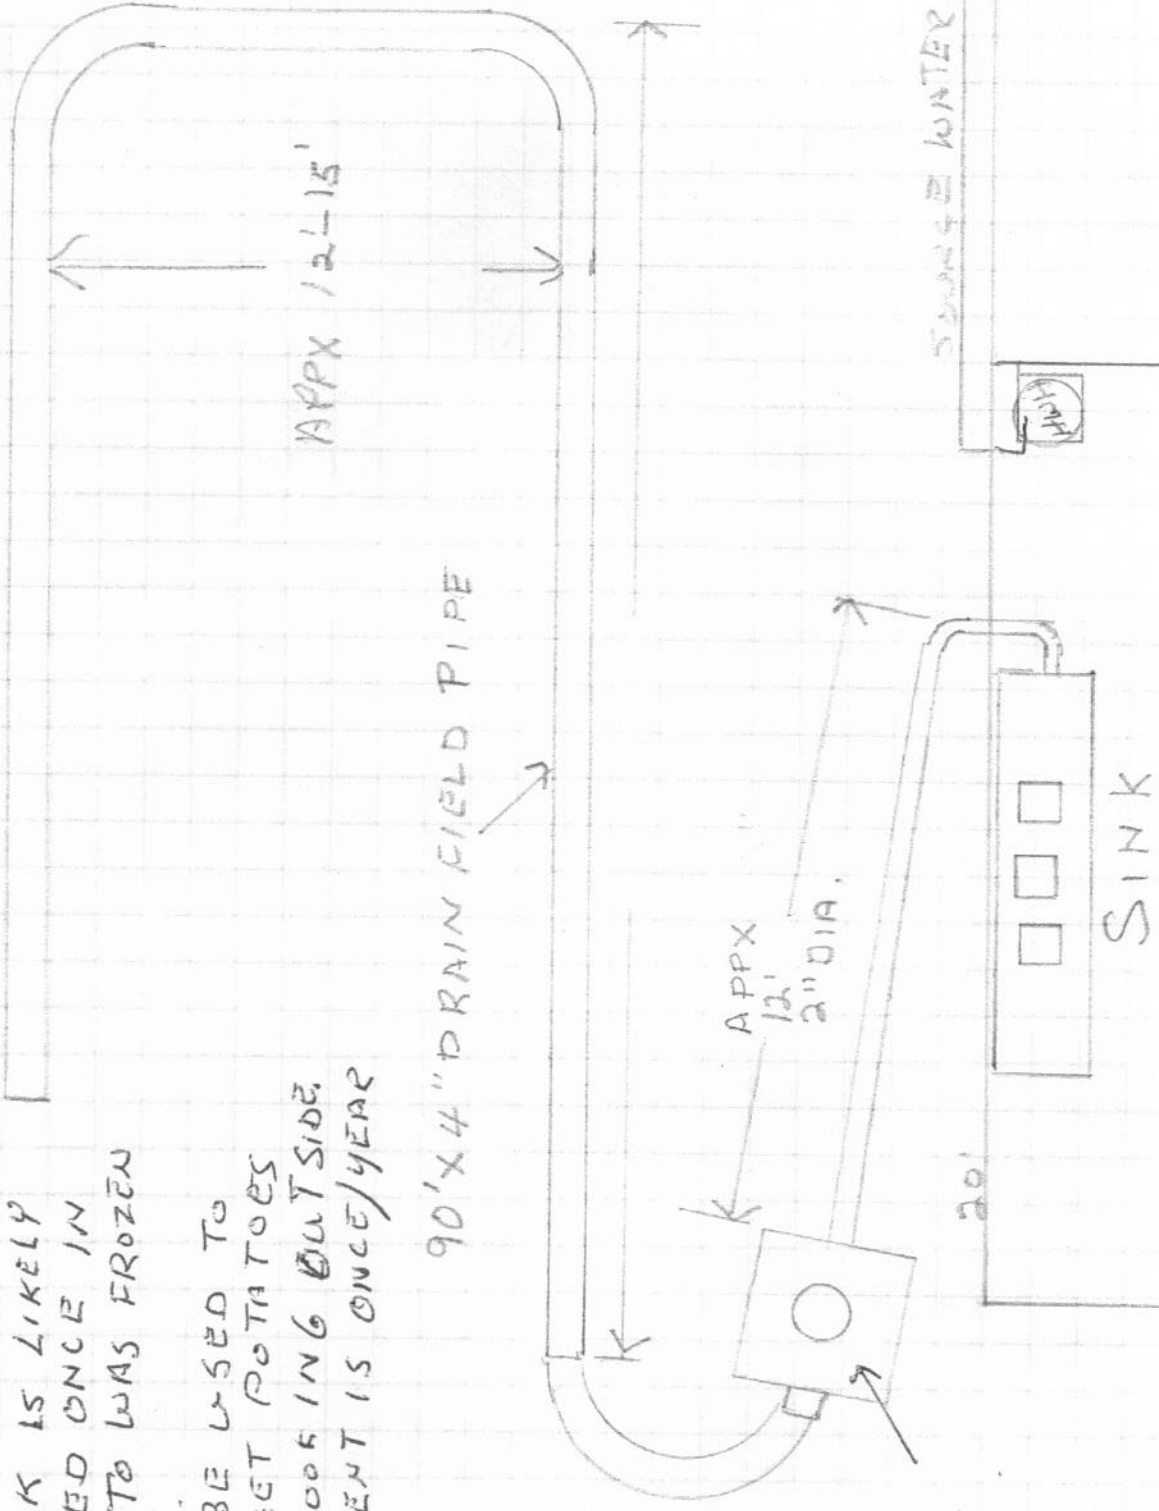

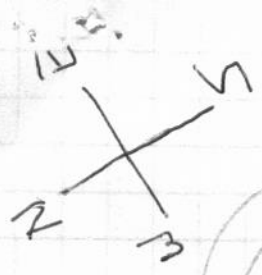

I will be traveling but please give me a call with questions and/or directions to take to correct the situation.
