Mr. Wenrich;

Thank you for submitting the fire alarm plans for the fire alarm system. The plans have been carefully reviewed by a qualified code enforcement official to examine for full compliance with the North Carolina Fire Prevention Code and all other fire protection regulatory documents. There are some items that were found during the plan review process that need to be addressed before a final inspection of the new facility can be given. These items are outlined and described below.

- **907.1.2 Fire Alarm Equipment**
 - Systems and their components shall be listed and approved for the purpose for which they are installed.

- **907.17 Acceptance tests.**
 - Upon completion of the installation of the fire alarm system, alarm notification appliances and circuits, alarm-initiating devices and circuits, supervisory-signal initiating devices and circuits, signaling line circuits, and primary and secondary power supplies shall be tested in accordance with NFPA 72
 - 100 % testing of devices

- **907.18 Record of completion.**
 - A record of completion in accordance with NFPA 72 verifying that the system has been installed in accordance with the approved plans and specifications shall be provided

Thank you again for submitting fire alarm plans for the fire alarm system. Please review the plans and adhere to any notes and alterations that were made in addition to the original drawings. These remarks are for the plans that were submitted and its original intent. These remarks do not apply if the original intent changes or what was submitted on the above date changes. If you have any questions, please do not hesitate to call this office.

Again, thank you and we look forward to working with you during the construction period!

Sincerely,

Michael L. Martin
Chief Deputy Fire Marshal

To whom it may concern,

Thank you for submitting the plans for the monastery. The plans have been carefully reviewed by a qualified code enforcement official to examine for full compliance with the North Carolina Fire Prevention Code and all other fire protection regulatory documents. There are some items that were found during the plan review process that need to be addressed before a final inspection of the new facility can be given. These items are outlined and described below.

- **906.1 Fire Extinguishers**
 - Fire extinguishers shall be placed in the store in such a manner so that placement of the extinguishers does not exceed a 50 foot travel distance.
 - The fire extinguishers provided shall have a minimum rating of 2A 5B:C and shall not be installed higher than 5 feet above the finished floor

- **505.1 Physical Address**
 - The physical address of the building shall be posted in a conspicuous place so that it can be seen on approach from the road, access road, and/or parking lot.
 - The numbers used to make up the physical address shall be at least 5 inches in height.
 - All interior rooms shall be labeled as to their identification in accordance with the fire alarm system.

- **903 Sprinkler System.**
 - A construction permit will be issued to the installer once detailed plans are supplied to the Fire Marshal's Office for review.
 - No construction may begin before a sprinkler system permit is given. This includes the lead in fire line for the riser.

- **907.1.1 Fire Alarm Construction Documents**
 - A permit has been issued for the construction of the building's fire alarm system.

- **703.1 Maintenance of Fire Assemblies**
 - All penetrations in the fire rated assemblies shall be visibly inspected for proof that the applicable listings for penetration protections were followed.

- **506.1 Knox Box**
 - A secure key box shall be installed on the new building that houses all keys to all the doors within the building in which the fire department would need access to in the event of an emergency.
 - A Knox Box will need to be installed on ALL buildings within the complex
 - Knox Box ID stickers shall be placed on all exterior doors in which entry to the building may be gained.
 - The box shall be mounted not to exceed 48 – 60 inches in height.
 - The basic model for the buildings should be at least a selection from the 3200 Series listed on the order form.

Thank you again for submitting the plans for the monastery. Please review the plans and adhere to any notes and alterations that were made in addition to the original drawings. These remarks are for the plans that were submitted and its original intent. These remarks do not apply if the original intent changes or what was submitted on the above date changes. If you have any questions, please do not hesitate to call this office

Again, thank you and we look forward to working with you during the construction period!

Sincerely,

Michael L. Martin
Chief Deputy Fire Marshal

Application Number 11-50026407

Mr Alt,

Thank you for submitting the plans for the sprinkler system installation. The plans have been carefully reviewed by a qualified code enforcement official to examine for full compliance with the North Carolina Fire Prevention Code and all other fire protection regulatory documents. There are some items that were found during the plan review process that need to be addressed before a final inspection of the facility can be given. These items are outlined and described below.

- **901.2.1 State of Compliance**
 - Before requesting final approval of the installation, where required by the fire code official, the installing contractor shall furnish a written statement to the fire code official that the subject fire protection system has been installed in accordance with the manufacturer's specifications and the appropriate installation standard. Any deviations from the design standards shall be noted and copies of the approvals for such deviations shall be attached to the written statement.

- **901.4 Installation**
 - Fire protection systems shall be maintained in accordance with the original installation standards for that system. Required systems shall be extended, altered, or augmented as necessary to maintain and continue protection whenever the building is altered, remodeled or added to. Alterations to fire protection systems shall be done in accordance with applicable standards.

- **903 4 Sprinkler system monitoring and alarms**
 - All valves controlling the water supply for automatic sprinkler systems and water-flow switches on all sprinkler systems shall be electrically supervised according to the NC State Fire Code

- **901 5 Installation acceptance testing**
 - Fire detection and alarm systems, fire-extinguishing systems, fire hydrant systems, fire standpipe systems, fire pump systems, private fire service main and all other fire protection systems and appurtenances thereto shall be subject to acceptance tests as contained in the installation standards and as approved by the code official. The code official shall be notified before any required acceptance testing.
 - **A contractor's material and test certificate shall be furnished by the trained representative of Carolina Fire Protection before final approval**

Thank you again for submitting the plans for the sprinkler system. Please review the plans and adhere to any notes and alterations that were made in addition to the original drawings. If you have any questions, please do not hesitate to call this office.

Again, thank you and we look forward to working with you during the construction period!
