**Re: 761 Pine Oak Lane  
Cameron NC 28326  
Engineer's Site Visit**

**Subject: As-built Foundation Certification**

**An on-site inspection of the foundation system for the manufactured home at the above referenced address was performed to verify structural adequacy. The tie-down anchor system required the additional tie-down anchors and fiber cement coating "Surewall" or equal as specified and applied on 6 dry stacked piers on the left end of the foundation as view from the front elevation. The requested additional strengthening requirements have been adequately installed.**

**It is my professional opinion that the as-built foundation piers and anchor system are structurally adequate.**
