Environmental Microbiology - Colilert Profile

Method: SM 9223B

Test Name: Colilert Analyte **Test Result Analyst** Date Total Coliform, Colilert Absent 01/30/2015 Denise Richardson E. coli, Colilert Absent 01/30/2015 Denise Richardson

Reported By: Susan Beasley Report Date: 01/30/2015

Tream Basley

Explanations of Coliform Analysis:

If coliform bacteria are Absent, the water is considered safe for drinking purpose. If coliform bacteria are Present, the water is considered unsafe for drinking purpose. Presence of E. coli (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
