Re: Application for improvement permit for New Jerusalem Church

Health Department file No.11-5-26385

Dear G&G Builders,

The Harnett County Health Department, Environmental Health Division on April 19, 2011 evaluated the above-referenced property at the site designated on the plat/site plan that accompanied your improvement permit application. According to your application the site is to serve a 40'x80' Fellowship Hall and Church with a design wastewater flow of 1145 gallons per day. The evaluation was done in accordance with the laws and rules governing wastewater systems in North Carolina General Statute 130A-333 including related statutes and Title 15A, Subchapter 18A, of the North Carolina Administrative Code, Rule. 1900 and related rules.

Based on the criteria set out in Title 15A, Subchapter 18A, of the North Carolina Administrative Code, Rules .1940 through .1948, the evaluation indicated that the site is **UNSUITABLE** for a ground absorption sewage system. Therefore, your request for an improvement permit is **DENIED**. A copy of the site evaluation is enclosed. The site is unsuitable based on the following:

- Unsuitable soil topography and/or landscape position (Rule .1940)
- Unsuitable soil characteristics (structure or clay mineralogy) (Rule .1941)
- Unsuitable soil wetness condition (Rule .1942)
- Unsuitable soil depth (Rule .1943)
- Presence of restrictive horizon (Rule .1944)
- Insufficient space for septic system and repair area (Rule .1945)
- Unsuitable for meeting required setbacks (Rule .1950)
- Other (Rule .1946) _____

These severe soil or site limitations could cause premature system failure, leading to the discharge of untreated sewage on the ground surface, into surface waters, directly to ground water or inside your structure.

The site evaluation included consideration of possible site modifications, and modified, innovative or alternative systems. However, the Health Department has determined that none of the above options will overcome the severe conditions on this site. A possible option might be a system designed to dispose of sewage to another area of suitable soil or off-site to additional property.

For the reasons set out above, the property is currently classified **UNSUITABLE**, and no strong roots • new growth

improvement permit shall be issued for this site in accordance with Rule .1948(c).

However, the site classified as **UNSUITABLE** may be classified as **PROVISIONALLY SUITABLE** if written documentation is provided that meets the requirements of Rule .1948(d). A copy of this rule is enclosed. You may hire a consultant to assist you if you wish to try to develop a plan under which your site could be reclassified as **PROVISIONALLY SUITABLE**.
