

COMMENTS:

2/18/2011 Met with Mr. + Mrs. Egnor on site.

It appeared that vehicle tracks coming from and going to an adjacent property were the cause of the failure. I probed the supply line ^{from the pump tank to D-Box} and marked an area where I thought the supply line had been broken. This was in the area ~~of the~~ where sewage had surfaced. Also marked the supply line ^{from D-Box} for the closest drain line to the house. No permit should be needed to repair the broken supply line.
