Subject: Re:

Bryan,

Ted Brown came out today and fixed the leach field. he rerouted the pipe from the first line right at the beginning of the distribution box to the beginning of the second pipe. he said the dirt in the second pipe was completely dry so there is something blocking the water from going all the way through the first pipe. probably the tree that was taking out. after he was done he ran the pump and water drained quickly out of the box into the pipe without a problem. so its all fixed and ended up costing me 175\$. so you can imagine i was more than happy to pay that little. thank you so much for coming out so quickly and making the process as easy as possible. i appreciate that. also Mr. Brown was very nice and funny and i had a good time while they were fixing it.

thank you so much
