NOTES: 1. Minimum exterior bearing length required is 1.8 inches. Minimum interior bearing length required is 3.0 inches.  
 If these minimum lengths are not provided, web crippling must be checked.  
 2. Always contact Vulcraft when using loads in excess of 200 psf. Such loads often result from concentrated, dynamic, or long term load cases for which reductions due to bond breakage, concrete creep, etc. should be evaluated.  
 3. All the listed assemblies are subject to an upper live load limit of 250 psf.  
 4. Inquire about material availability of 17, 19 & 21 gage.
