Mr. Hart,

I made a visit to your property today November 8, 2010. I measured the area that is needed to repair your septic drain field. Unfortunately the proposed building site falls within this area. If the proposed building was to be located on the opposite side of the yard, being 10 feet from the side property and no bigger than 18 ft. x 18 ft. I would then be able to issue a permit for the building. You would need to revise your application and site plan with the central permitting office if the suggested building site is ok. I will be out of the office until this Friday 12th of November. Please call between the hours of 8-9 a.m. if you have any questions.
