**Environmental Microbiology - Default Profile** 

Method: SM 9223B

Test Name: Water - Colilert 18

| Analyte                     | Test Result | Date       |
|-----------------------------|-------------|------------|
| Total Coliform, Colilert 18 | Present     | 09/13/2017 |
| E. coli, Colilert 18        | Absent      | 09/13/2017 |

Report Date: 09/15/2017

Reported By: Susan Beasley

Turan Baarley

## **Explanations of Coliform Analysis:**

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of E. coli (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply. SEP 1 8 2017
