

HTE# 10-5-25157

# Harnett County Department of Public Health Improvement Permit

26292

A building permit cannot be issued with only an Improvement Permit

ISSUED TO: KEN DAWSON HOMES PROPERTY LOCATION: BEAVER CREEK DR  
 NEW  REPAIR  EXPANSION  SUBDIVISION: BENNETT PLACE LOT # 28  
 Type of Structure: SFD (38'x60') Site Improvements required prior to Construction Authorization Issuance: \_\_\_\_\_  
 Proposed Wastewater System Type: FILL SYSTEM  
 Projected Daily Flow: 480 GPD  
 Number of bedrooms: 4 Number of Occupants: 8 max  
 Basement  Yes  No  
 Pump Required:  Yes  No  May be required based on final location and elevations of facilities  
 Type of Water Supply:  Community  Public  Well Distance from well 100 feet  
 Permit conditions: \_\_\_\_\_ Permit valid for:  Five years  No expiration

Authorized State Agent: [Signature] REMS Date: 10/15/10 SEE ATTACHED SITE SKETCH  
 The issuance of this permit by the Health Department in no way guarantees the issuance of other permits. The permit holder is responsible for checking with appropriate governing bodies in meeting their requirements. This site is subject to revocation if the site plan, plat, or the intended use changes. The Improvement Permit shall not be affected by a change in ownership of the site. This permit is subject to compliance with the provisions of the Laws and Rules for Sewage Treatment and Disposal and to conditions of this permit.

## Construction Authorization

(Required for Building Permit)

The construction and installation requirements of Rules .1950, .1952, .1954, .1955, .1956, .1957, .1958, and .1959 are incorporated by references into this permit and shall be met. Systems shall be installed in accordance with the attached system layout.

ISSUED TO: KEN DAWSON HOMES PROPERTY LOCATION: BEAVER CREEK DR  
 SUBDIVISION: BENNETT PLACE LOT # 28  
 Facility Type: SFD (38'x60')  New  Expansion  Repair  
 Basement?  Yes  No Basement Fixtures?  Yes  No  
 Type of Wastewater System\*\* FILL SYSTEM (Initial) Wastewater Flow: 480 GPD  
 (See note below, if applicable  FILL SYSTEM (Repair))

### Installation Requirements/Conditions

Septic Tank Size 1000 gallons  
 Pump Tank Size 1000 gallons  
 SEE ATTACHED FOR ALL SPECIFICATIONS  
 Number of trenches \_\_\_\_\_  
 Exact length of each trench \_\_\_\_\_ feet  
 Trenches shall be installed on contour at a  
 Maximum Trench Depth of: \_\_\_\_\_ inches  
 (Trench bottoms shall be level to +/- 1/4" in all directions)  
 Pump Requirements: \_\_\_\_\_ ft. TDH vs. \_\_\_\_\_ GPM  
 Trench Spacing: \_\_\_\_\_ Feet on Center  
 Soil Cover: \_\_\_\_\_ inches  
 (Maximum soil cover shall not exceed 36" above the trench bottom)  
 Aggregate Depth: \_\_\_\_\_ inches below pipe  
 \_\_\_\_\_ inches above pipe  
 \_\_\_\_\_ inches total  
 Conditions: THIS PERMIT BASED ON A PROPOSAL FROM APPLICANTS SOIL CONSULTANT.

**WATER LINES (INCLUDING IRRIGATION) MUST BE 10FT. FROM ANY PART OF SEPTIC SYSTEM OR REPAIR AREA.  
NO UTILITIES ALLOWED IN INITIAL OR REPAIR DRAIN FIELD AREA.**

\*\*If applicable: I understand the system type specified is different from the type specified on the application. I accept the specifications of this permit.  
 Owner/Legal Representative Signature: \_\_\_\_\_ Date: \_\_\_\_\_

This Construction Authorization is subject to revocation if the site plan, plat, or the intended use changes. The Construction Authorization shall not be transferred when there is a change in ownership of the site. This Construction Authorization is subject to compliance with the provisions of the Laws and Rules for Sewage Treatment and Disposal and to the conditions of this permit. SEE ATTACHED SITE SKETCH

Authorized State Agent: [Signature] REMS Date: 10/15/10  
 Construction Authorization Expiration Date: 10/15/15

1" = 40'

**Guideline For Design and Installation of Fill Systems with Conventional Trenches**  
*Gravel Trench, Polystyrene, or Chamber*

**I. Trench and Fill Specifications**

<u>II</u>	- Soil Texture Group	<u>.118</u> ft.	- Length of Fill
<u>.6</u> gpd/sq. ft.	- Acceptance Rate	<u>.45</u> ft.	- Width of Fill
<u>480</u> gpd	- Sewage Flow	<u>5130</u> sq. ft.	- Total Fill Area
<u>800</u> sq. ft.	- Trench Bottom	<u>15</u> in.	- Depth of Sand
<u>3</u> ft.	- Trench Width	<u>175</u> cu. yd.	- Volume of Sand
<u>270</u> ft.	- Total Trench Length	<u>6</u> in.	- Depth of Topsoil
<u>3</u>	- Number of Trenches	<u>885</u> cu. yd.	- Volume of Topsoil
<u>90</u> ft.	- Length of each Trench		

**II. Site Preparation**

1. Place flags at the 4 corners of the area to be filled designated on the improvement permit. Failure to place fill in the permitted area may result in the fill having to be moved or the permit revoked.
2. Do not work when the site is wet. Working on soil when wet can destroy soil structure making the site unsuitable for a Construction Authorization.
3. Remove all above ground vegetation and root mat from area to be filled without removing topsoil. Removal of soil can result in revocation of the permit.
4. Disk the area to be filled to a depth of 6 inches to break up root mat.

**III. Placement Of Fill**

1. Add 3 to 4 inches of approved sand fill to area and disk again to thoroughly mix the original soil and the fill. Approved sand fill is a sand or loamy sand.
2. Add more sand fill to achieve a uniform height of SD (see diagram) in the middle of the fill area.
3. The fill shall be tapered from the top edge of the fill to the ground surface 2 feet from the boundary of the fill area. The top edge of fill is located 5 feet from the proposed trenches.

4. Six (6) inches of finer textured fill shall be placed over the sand fill and extend to the boundary of the fill area. Finer texture is necessary to establish a vegetative cover which will prevent erosion of the fill. Fill used for cover shall be a sandy loam, loam, silt loam or sand clay loam texture. See CD dimension of diagram. Side slope shall be 1 to 4 except for site with Soil Texture Group 1 which can have a side slope of 1 to 3.
5. Contact Health Department for inspection of fill before constructing trenches. A Construction Authorization must be obtained before proceeding.

#### IV. Trench Construction

1. The outside edge of any trench shall be 5 feet from the top of the side slope of the fill.
2. This system is designed with 3 trenches which are 90 ft. long and 3 ft. wide. Trenches must have a spacing of 9 ft. on centers.
3. Trench bottoms shall be no deeper than 18 inches below finished grade of the fill.
4. Trench bottoms shall be constructed level.
5. Distribution boxes shall be located 5 feet from the top edge of the fill.
6. Call the Health Department for inspection after the trenches are finished.

#### V. Landscaping

1. The fill must be shaped to shed surface water and shall be stabilized with grass or other suitable cover to prevent erosion.
2. Vegetation must be maintained after established. Grass must be mowed.
3. Additional fill beyond what has already been specified may be necessary to cover and landscape around the septic tank.
4. Call the Health Department for inspection after landscaping is complete. The Operation Permit allowing use of the system is issued at this time.

DIMENSIONS OF FILL SYSTEM

DEFINITIONS

WT - width of top  
 LT - length of top  
 WB - width of bottom  
 LB - length of bottom

SS - side slope  
 SD - sand depth  
 CD - cover depth

## Calculation of Fill Volume

## Total volume of fill (TVF)

$$TVF = [(LT + LB) / 2 \times (WT + WB) / 2] \times TFD$$

$$= [(\underline{100} \text{ FT.} + \underline{114} \text{ FT.}) / 2 \times (\underline{31} \text{ FT.} + \underline{45} \text{ FT.}) / 2] \times \underline{1.25} \text{ FT.}$$

$$= \underline{715.5} \text{ CU. FT.}$$

(DIVIDE BY 27 CU. FT. TO OBTAIN CU. YDS.)

$$= \underline{26.5} \text{ CU. YDS.}$$

## Total volume of sand (TVS)

$$TVS = [(LT + LB - 4) / 2 \times (WT + WB - 4) / 2] \times SD$$

$$= [(\underline{100} \text{ FT.} + \underline{114} \text{ FT.} - 4) / 2 \times (\underline{31} \text{ FT.} + \underline{45} \text{ FT.} - 4) / 2] \times \underline{1.25} \text{ FT.}$$

$$= \underline{415} \text{ CU. FT.}$$

(DIVIDE BY 27 CU. FT. TO OBTAIN CU. YDS.)

$$= \underline{15.4} \text{ CU. YDS.}$$

## Total volume of cover (TVC)

$$TVC = TVF - TVS$$

$$= \underline{263.5} \text{ CU. YD.} - \underline{15.4} \text{ CU. YD.}$$

$$= \underline{248.1} \text{ CU. YD.}$$

## Key to abbreviations:

LT = length of top  
 LB = length of bottom  
 WT = width of top  
 WB = width of bottom

TFD = total fill depth  
 = SD + CD  
 SD = sand depth  
 CD = cover depth
