----- COMMENTS AND NOTES -----

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

A third reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

A fourth reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

A fifth reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

A sixth reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

A seventh reason for the increase in the number of people employed in the public sector is the increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions. This is leading to an increase in the number of people who are frail and need health care services. In addition, there is an increasing demand for health care services from people who are living longer lives and who are more likely to have chronic conditions.

----- COMMENTS AND NOTES -----

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

As a result of the demographic changes, the number of people in the world who are 65 years of age and older is expected to increase from 200 million in 1990 to 500 million in 2025. This increase is expected to be particularly significant in the developed countries.

The demographic changes are also expected to have a significant impact on the labor force. The number of people in the labor force is expected to increase from 1.5 billion in 1990 to 2.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the economy. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the environment. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the social structure. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the political system. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the culture. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the education system. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the health care system. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the housing system. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the transportation system. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the energy system. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.

The demographic changes are also expected to have a significant impact on the environment. The number of people in the world who are 15 years of age and older is expected to increase from 4.5 billion in 1990 to 6.5 billion in 2025. This increase is expected to be particularly significant in the developing countries.
