RE: Engineering – Field Observation
Lot 95 Trotters Ridge Subdivision
Lillington, NC
Job No.: 12DDM-0626D

To whom it may concern/ Inspections Dept.:

A representative of the undersigned's arrived on-site to observe and test the in-place fill and natural soils conditions for the above referenced site. Based on the testing (Per ASTM Special publication 399) the fill and natural materials (Reddish tan silty sands (Unified Soil Classification System – SM/ML)) were adequately compacted (95% Standard Proctor) and/or are adequate to support the planned structure. Based on the observations and testing the bearing soils for the footings will provide adequate support.

Sincerely,

David Miller, PE

DEM/12DDM-0626D
