RE: Engineering – Field Observation  
Lot 124 Tingen Pointe Subdivision  
Lillington, Harnett County, NC  
Job No.: 12DDM-0829C

To whom it may concern/ Inspections Dept.:

The undersigned arrived on-site 8-29 and 30-12 to observe and test the in-place fill conditions for the above referenced site. Based on the testing (Per ASTM Special publication 399) the fill materials (Tan and grey silty sands (Unified Soil Classification System – SM)) were adequately compacted (95% Standard Proctor) and adequate to support the planned structure. Based on the observations and testing the bearing soils for the footings will provide adequate support.

Sincerely,

David Miller, PE
