Hi Jim,

Scott Guy asked me to take another look at his lot. He and the installer wanted to put in 4 – 75' foot lines vs. the 3- 100' lines. Scott said somebody from the county looked at the lot and advised him to get me to submit a revised proposal. I took a look at it and actually thought we should shift the system anyway do to some questionable soil that I did not see the first time I was at the site. I move the lines about 20 towards the west property line. I didn't lay out a repair, but will be glad to do that if you want to see it on the site plan. Let me know if you have any concerns or questions.
