TEST RESULTS AND USE RECOMMENDATIONS 1. Your well water meets federal drinking water standards <i>for inorganic chemicals</i> . Your water can be used for drinking, cooking, washing, cleaning, bathing, and showering based on the <i>inorganic chemical results only</i> . You may have other water sampling results that are not taken into account in this report. 2. The following substance(s) exceeded federal drinking water standards or the North Carolina 2L calculated health levels. The North Carolina Division of Public Health recommends that your well water not be used for drinking and cooking, unless you install a water treatment system to remove the circled substance(s). However, it may be used for washing, cleaning, bathing and showering based on the <i>inorganic chemical results only</i> .										
Arsenic	Barium	Cadmium	Chromium	Copper	Fluoride	Lead	Iron			
1anganese	Mercury	Nitrate/Nitrite	Selenium	Silver	Magnesium	Zinc	pН			
 3. a. Sodium levels exceed the U.S. Environmental Protection Agency's (USEPA) Health Advisory level for sodium of 20 mg/l. The North Carolina Division of Public Health recommends that only individuals on no or low sodium restricted diets not use this water for drinking or cooking. It may be used for washing, cleaning, bathing, and showering based on the <i>inorganic chemical results only</i>. b. Levels over 30 mg/l may pose aesthetic problems such as bad taste, odor, staining of porcelain, etc. 										
4. Re-sampling is recommended inmonths.										
5. Re-sample for lead and /or copper. Take a first draw, 5 minute, and 15 minute sample inside the house (preferably the kitchen) and if possible a first draw, 5 minute and a 15 minute sample at the well head to determine the source of the lead and/or copper.										
6. The following substance(s) exceeded federal drinking water standards. Your water can be used for drinking, cooking, washing, cleaning, bathing, and showering based on the <i>inorganic chemical results only</i> , but <u>aesthetic</u> problems such as bad taste, odor, staining of porcelain, etc. may occur. You may want to install a household water treatment system to address aesthetic problems.
