Piney Grove Rawls Road
Plan Revision

Based on the request of the homeowner, the following items will be modified on the Jordan Residence Custom Plan designed by S&S Contracting:

- Sheet S3 – The ceiling joists above bedroom 2, on the front of the house, will be removed. The 2x8 ceiling joist will remain over the bedroom 2 closet and the other small closet. The new ceiling above bedroom 2 will be a cathedral. The main roof and the A-frame of above this bedroom will be framed as shown on sheet S6. 2x6 false rafters and a 2x8 ridge beam will be added under the main roof and A-frame to create the cathedral. The false rafters will rest on the left side wall between the bedroom and the closet and on the right side wall.

This revision meets all the requirements of the 2012 North Carolina Building Code for Residences.
