Email: m\_s\_brown1988@yahoo.com

Reference: Brown Residence  
Project No.: 1801-010150

This letter is to address framing changes to the above referenced plans. The roof and ceiling will now be framed with roof trusses bearing on the exterior walls only. Ceiling joists and beams previously shown on the plans are no longer required. All exterior header sizes remain unchanged. Since there will no longer be any interior load bearing walls, a thickened slab footing is no longer required under any interior walls.

We appreciate being able to assist you during this phase of the project. If you need further assistance or require additional information, please do not hesitate to contact us.

Sincerely,  
Tyndall Engineering & Design

Prentice A. Tyndall Jr., P.E.
